

Kanguru Endpoint Protector™

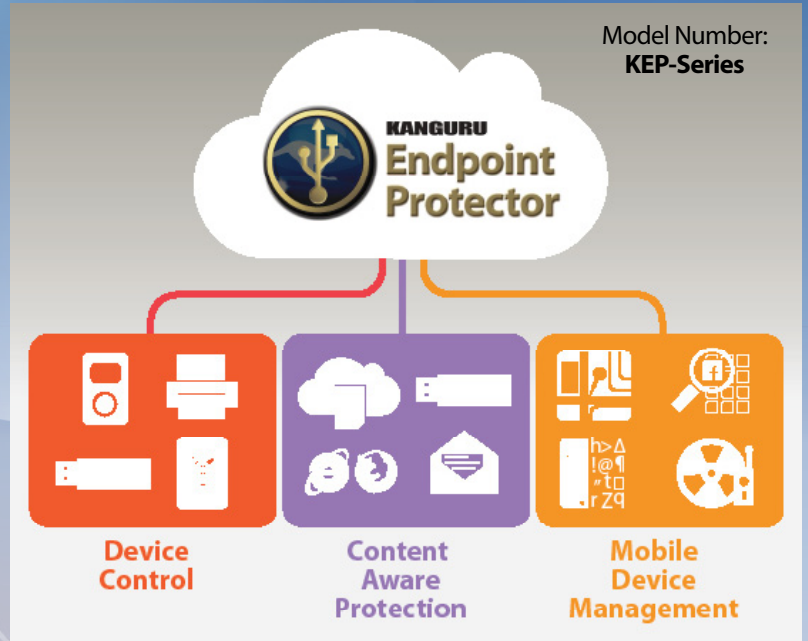

100% Cloud-Based Endpoint Security Protection

Endpoint Security provides organizations with tremendous administrative control over content, USB plug-in devices, social media, web, communications and mobile devices- all from one convenient cloud-based console. With Kanguru Endpoint Protector, IT managers can create policies, whitelist or blacklist devices, enable permissions, create restrictions, allow/disallow certain brands on the network and much more. Additionally, managers can audit, silently report violations and develop reports.

Today's BYOD environment requires system administrators to be diligent, with a strong, all around security solution in place to manage and protect their environment from all kinds of threats. With Kanguru Endpoint Protector, administrators will have centralized control over the whereabouts and advanced protection of company data.

Kanguru Endpoint Protector provides complete, centralized administrative control:

- **Device Control**
- **Content Aware Protection**
- **Mobile Device Management**
