

Life threatening emergencies in our schools are an ever increasing reality.

HOW CAN THE **inSchool ALERT** HELP WHEN SECONDS COUNT?

The inSchool Alert provides a mobile app to quickly connect with First Responders and immediately notify Teachers, Staff and Administrators of an emergency situation, so they can initiate safety procedures while waiting for First Responders to arrive.

HOW IT WORKS

With the push of a button on their smart phone INDIVIDUALS SELECTED TO VIEW THE CALL DIRECTORY will

Be connected by phone to the appropriate First Responders

AND the system will

Initiate an automated push notification, text and email describing the type of incident to only pre-selected contacts such as:

- First Responders
- School Administrators
- Teachers and Staff
- On Site Resource Officers

Additional Feature of the inSchool ALERT

School Administrators can keep the School Community and Public updated with important messages by push notification to the app and text messaging any time the need arises by using the ALERT SYSTEM'S NOTIFICATION MODULE.
