

2016: THE YEAR OF MEMPHIS

At Memphis Wood Fire Grills, we're known for our innovation and rock-solid products. We're happy to announce that this trend continues in 2016 with an exciting update to our entire line of grills.

HERE'S WHAT'S NEW:

NEW CONTROLLER WITH WI-FI, LCD SCREEN, AND 3 MEAT PROBE INPUTS

The integrated Wi-Fi and free Memphis Mobile App (iOS) give you the freedom to monitor and adjust your grill and food temps from anywhere you desire. Most other Wi-Fi or Bluetooth grill controllers only work locally (meaning you have to remain in range). Our technology works through the "cloud" ensuring you can monitor/control your grill from home, work, the store, or your car (the passenger seat, of course).

UPDATED BRANDING

You've already seen our new logo, now it's time to put it on a grill!

INCREASED STORAGE

Both right and left shelves on the Pro and Elite open for enhanced storage!

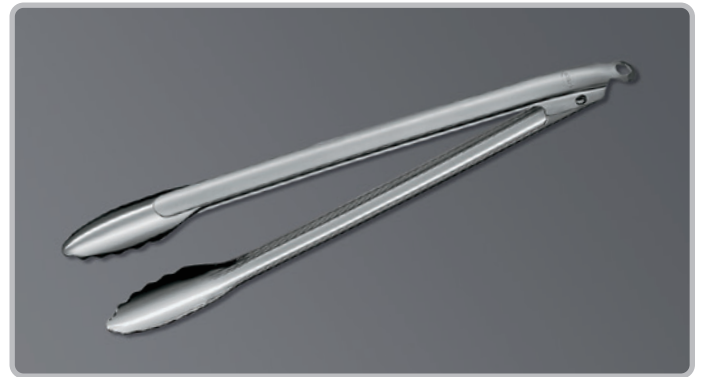

ACCESSORIES NOW INCLUDED

Every grill now comes with a free direct flame insert, genie tool, and bag of pellets. The Pro and Elite also come with a free meat probe.

MORE ACCESSORIES NOW AVAILABLE!

We're proud to announce our partnership with Rösle and will be carrying a selection of their amazingly crafted high-end accessories.

UPDATED PELLET BAG DESIGN

A brand new look to compliment the highest quality pellets in the market.

OTHER IMPROVEMENTS

- We lowered the lowest set point on the Advantage from 200 to 180 degrees.
- The new built-in controller “box within a box” simplifies installation, can be roughed in during an island build, is easier to service, and further protects the controller from the elements.
