PRESS RELEASE

X INFOTECH collaborates with Elyctis to advance quality control in eID document issuance

---

X INFOTECH, a global expert in government eID projects, has partnered up with Elyctis to provide a complete solution for eID document production management.

PERTUIS, FRANCE and RIGA, LATVIA, May 16, 2016 – X INFOTECH, a global system integrator for electronic identity (eID) projects, headquartered in Latvia, has embraced Elyctis know-how in the company's offering in order to offer a comprehensive, all-in-one solution for ePassport and eID card issuance.

X INFOTECH's solutions perform all the necessary functions to manage the entire production workflow for efficient and secure eID document issuance, enabling a step-by-step process, which encompasses data preparation, document production management along with control over the eID document production environment and quality checks of produced eID documents.

Recognized by numerous governments, eID solution suppliers and integrators worldwide, X INFOTECH has integrated the Elyctis ID BOX One reader to improve the quality-control mechanism for a number of customers, deploying eID production management.

The successful collaboration between X INFOTECH and Elyctis has made an important contribution to the flexibility and versatility of both companies' offerings. By working together X INFOTECH and Elyctis are now able to provide combined market-leading solutions along with effective integration for various eID projects.

"The successfully implemented projects in the past pave the way towards new joint eID projects in the future," said Sergey Yeliseyev, Business Development Director, Government eID solutions, X INFOTECH. "The already-completed implementations have proven to be highly satisfactory for the customers and beneficial to Elyctis and ourselves."

Alexander Popov, Technical Director, Government eID solutions, X INFOTECH adds: "Our tests have demonstrated that Elyctis ID Box One readers deliver an added value for eID document production process, thus ensuring a superior quality of eID document issuance."

Alexandre Joly, Elyctis CEO adds: "The fact that a reference company in the field of ePassport issuance, management and validation like X INFOTECH integrates our product

is the best demonstration of our common interest in proposing a combined offer to serve the eID document markets."
