

## Benefits

- Saves management time by quickly providing sexual assault kit statistics
- Enables management to demonstrate to agencies they are meeting performance deadlines

## Feature Overview: Sexual Assault Kit Tracking

### Track statistics related to sexual assault kit processing in your lab

Sexual assault kits are receiving an increased level of attention as pressure escalates for kits to be processed and survivors informed of results. Are you using spreadsheets to track the number of kits in your lab and all the associated processing details? Would it save you and your team time and irritation if all of that were automatically tracked?

Sexual Assault Kit tracking is included with STACS-CW Enterprise, the leading forensic DNA sample processing software for casework laboratories.

STACS-CW tracks:

- **serology turnaround time**
- **male screening turnaround time**
- **DNA turnaround time**
- **number of kits submitted**
- **status of each kit (in processing or completed)**
- **CODIS entries**

## About STACS DNA

STACS DNA™ helps DNA labs meet performance and accountability expectations. We do this through sophisticated software that, based on each customer's specific workflows, becomes the integrated hub of their automated DNA sample processing.

The result? An unprecedented acceleration in the ability to process DNA samples, leading to increased productivity, decreased costs, reduced backlogs and a faster time to justice. Our customers also report reduced errors and increased data quality, resulting in smoother problem resolution and audits, and decreased use of paper.

STACS DNA has been working with the DNA community since 2000. We work with databank and casework labs of all sizes.

**United States**  
STACS DNA Inc.  
10605 Barn Swallow Court  
Fairfax, VA 22032

**Canada/International**  
STACS DNA Inc.  
2255 St Laurent Blvd., Suite 206  
Ottawa, ON K1G 4K3

## Reports

Below are samples of two of the reports that can be generated from STACS-CW.

<b>Sexual Assault Kit Summary Report</b>	
Between 1/1/2015 and 12/31/2015	
Agency: Anytown Police Department, Community Police Department	
<b>Anytown Police Department</b>	
Average Serology Turnaround Time:	27.2days
Average Male Screening Turnaround Time:	0.1days
Average DNA Turnaround Time:	0.1days
Kits Submitted:	6
Kits Completed:	2
CODIS Entry:	0
<b>Community Police Department</b>	
Average Serology Turnaround Time:	8.0days
Average Male Screening Turnaround Time:	0.0days
Average DNA Turnaround Time:	0.0days
Kits Submitted:	20
Kits Completed:	11
CODIS Entry:	0
Average Serology Turnaround Time:	14.4days
Average Male Screening Turnaround Time:	0.0days
Average DNA Turnaround Time:	3.1days
Kits Submitted:	60
Kits Completed:	14
CODIS Entry:	1
