Colorado Time Systems Releases Next Generation Diving Equipment

Loveland, CO—May 25, 2016— Colorado Time Systems, a PlayCore company, is pleased to announce the release of the new Gen7 diving equipment. Gen7 diving software and hardware were developed to meet the requests made by USA Diving and FINA to have wired judging systems in place for elite diving events.

The Gen7 diving system has been used at major events including: USA Diving Winter Nationals, UANA Puerto Rico Grand Prix, USA Diving Synchronized National Championships, Big 10 Championships, NCAA Championships, and more. The system will also be utilized at the upcoming USA Diving Olympic Team Trials in Indianapolis this June.

The software and hardware support FINA (including mixed synchro), USA Diving, NCAA, and high school (including CIF 1m/3m springboard) rules. Gen7 diving software features a modern, intuitive interface and work flow, and is optimized for touch screens.

The Gen7 diving judging terminals feature a sealed keyboard with a backlit LCD display suitable for indoor and outdoor sunlight readability, and a rugged locking communications cable that connects each judging terminal to the diving interface box to ensure that no connections will inadvertently come loose during a meet.
