**Peak Serum, Inc., Supplier of Life Science Laboratory Products,
Joins Georgia Bio**

COLORADO – May 6, 2016 – Peak Serum, Inc. is proud to announce its recent membership to Georgia Bio (GaBio), joining esteemed members such as The University of Georgia, Johnson & Johnson, Emory University and Sutherland.

Georgia Bio is a non-profit, membership-based organization that promotes the interests and growth of the life sciences industry.

In an effort to advance the growth of Georgia’s life sciences industry, GaBio conducts business and economic development activities; advocates on public policy matters; educates the public about the benefits of life science research and provides a thriving network for the exchange of ideas, information and opportunities.

“Georgia Bio was a logical and natural fit for Peak Serum based on their goals to improve the state of the environment, expand the number of technology jobs and enhance student achievement in science education. Peak Serum is looking forward to being a part of this coalition to create a healthier world,” said Tom Kutrubes, President and CEO of Peak Serum.

Peak Serum, Inc. is a privately owned and independent supplier of life science laboratory products with a core focus on Fetal Bovine Serum (FBS) for cGMP / clinical trial research and diagnostics applications.

Peak Serum offers a wide range of high quality, 100% US origin and USDA-approved FBS products for all levels of research compliance. Peak Serum’s products are backed with superior knowledge, while delivering competitive market pricing and a consistent, readily available supply.

“We have used several brands of serum in our laboratory, but only use Peak Serum now,” said Laura Chubb on behalf of Colorado State University Flint Animal Cancer Center. “The improvement we have seen with Peak Serum is in the proliferation rate

of our mesenchymal stem cells, it has been much improved over other serum brands.”

About Peak Serum, Inc.

Peak Serum, Inc. is a privately owned and independent supplier of life science laboratory products, conveniently located near high-technology science parks in Denver, Boulder and Fort Collins, Colorado. The company’s core focus is Fetal Bovine Serum (FBS) for cGMP / clinical trial research and diagnostics applications. Peak Serum offers a wide range of high quality, 100% US origin and USDA-approved FBS products for all levels of research compliance. Peak Serum’s products are backed with superior knowledge, while delivering competitive market pricing and a consistent, readily available supply.
