

## Summit Materials chooses CXO-Cockpit to fully leverage their EPM intelligence with Agile Performance Reporting.

**Leading aggregates based construction materials company creates a single point of entry for management reporting, by directly connecting to Enterprise Performance Management (EPM) systems.**

**DENVER, Co. May 2016** - CXO-Cockpit, global provider of integrated Strategic Performance Reporting solutions for leading Enterprise Performance Management (EPM) systems, is proud to announce our newest member of the CXO-Cockpit Customer Community.

Summit Materials, Inc. (NYSE: SUM, "Summit"), a leading vertically integrated construction materials company, has chosen CXO-Cockpit as their single point of entry for their management reporting, directly connecting to their Oracle Essbase and Oracle Hyperion Financial Management (HFM) Enterprise Performance Management (EPM) data to ensure *speed with control*: faster decision-making coupled with full end-to-end "single point of truth" governance of reporting processes.

*"Implementing CXO-Cockpit at Summit Materials is a game changer for us in our ability to access information at all levels of our organization, from our individual operating companies to our senior executive team. CXO-Cockpit has given us the platform to leverage our IT infrastructure and systems, to have key information available at our finger tips, in an incredibly user friendly way."* Says Tony Keenan, Senior VP of Finance at Summit Materials Inc. *"From the initial proof-of-concept through to execution, in less than two months we developed a great partnership and collaboration with all levels of the CXO-Cockpit organization. We are excited at the future possibilities and opportunities that CXO-Cockpit will bring us. Together we will continue to develop new reporting formats and leverage the capabilities of the CXO-Cockpit strategic reporting platform to its fullest."*

*"We are proud to support Summit in achieving its 'finance transformation' goals,"* says Hugo Ehrnreich, Group CEO of CXO-Cockpit. *"Leveraging CXO-Cockpit's concept of 'agile reporting' to help unleash the full power of its Oracle Hyperion investment and talented finance team."*

*"It is a great pleasure to welcome Summit to the CXO Community in this exciting next stage of our US growth,"* adds Wouter Born, CTO & CEO CXO-Cockpit USA Inc.

### ABOUT SUMMIT MATERIALS

Summit is a leading vertically integrated materials-based company that supplies aggregates, cement, ready-mixed concrete and asphalt in the United States and British Columbia, Canada. Summit is a geographically diverse, materials-based business of scale that offers customers a single-source provider of construction materials and related downstream products in the public infrastructure, residential and non-residential, and end markets. Summit has completed more than 35 acquisitions since its founding and continues to pursue growth opportunities in new and existing markets. For more information about Summit Materials, please visit [www.summit-materials.com](http://www.summit-materials.com).

## ABOUT CXO-COCKPIT

CXO-Cockpit is an independent software company founded in 2007 by a team of Finance and Enterprise Performance Management (EPM) professionals with the aim of helping finance teams overcome the limits of Excel-based reporting processes and generic Business Intelligence (BI) tooling, optimize their processes and unleash the full potential of their organizations' EPM systems, information and human talent. Thanks to prebuilt financially-intelligent EPM connectors, fully integrated commentary/narrative and strong reporting process governance, the HTML5 mobile and web-based CXO-Cockpit Strategic Performance solution ensures a true, shared and trusted single point of insight for fast and secure decision-making with full financial control, anywhere and at any time. CXO-Cockpit has an exclusive global customer base of over 80 multinational corporations and provides integrated Strategic Performance Reporting Solutions for all leading Enterprise Performance Management (EPM) systems, including Oracle Hyperion (Enterprise, HFM, and Essbase) SAP (BPC, BW, HANA) Tagetik and IBM (TM1).
