

BRForms®

The leader in web-based reporting, BuildingReports makes inspection reporting easier and more accurate by allowing users to choose from a library of standard forms or create custom forms.

Create a Form

BRForms' web-based features give users the flexibility to create new forms or to choose from a variety of standard and custom documents in the BuildingReports Forms Library. Available for a range of mobile and desktop operating systems and devices, BRForms offers over 40 different form elements to allow users to quickly convert existing paper forms into digital documents. This includes work orders, maintenance reports, service requests and inspections. Users can complete forms online or on their mobile devices and with this one-time data capture method, upload them to their personalized web portals.

By providing mobile-to-web technology and eliminating cumbersome paper processes, BuildingReports makes capturing critical data easy and efficient.

Online Convenience

BRForms provides an unsurpassed method of automating the distribution, availability, and accessibility of forms. Unlike paper forms, digital forms are dated for easy tracking and conveniently stored for access and distribution as needed. Completed forms are available to authorized users via a unique login ID and password that you assign and control.

No special software is needed to create, edit, or update the forms – just internet access. Users can print the form, download as a document, or view the forms online in your web portal from BuildingReports. Once users login, they can immediately access the most recently completed forms. The Internet becomes your conduit for forms technology, and your web portal provides real-time access to the most advanced forms system in the industry.

Features

- Powerful digital form design, distribution and reporting
- Convenient 24/7 online access
- Track changes with Version Control
- Easy to use Form Designer
- Robust report engine
- Extensive Forms Library
- Secure 256-bit encryption
- Plenty of data storage

Benefits

- Online forms system automates processes, reduces paper, and provides web-based reporting
- You control the login ID and password for every user
- Maintains tight control of forms and versions – no more wrong or outdated forms
- Build any form online
- Display your form as a web page or document
- Select and use any form from the Forms Library
- Your forms and data are always secure with 256-bit encryption and user authentication
- Forms are stored on the website for 5 years, and includes back-ups

Reliable Security

BuildingReports guarantees the security of your data with vigorously protected servers, multiple daily backups, and off-site data archiving. BuildingReports provides 256-bit data encryption and GeoTrust® SSL certification. While your data resides on BuildingReports' servers, be assured it belongs only to you. Now you can have confidence in the security and integrity of your information.

BRForms Elements

Form title and index	Form title, subject, and index for each form created
