CVP-500 and ProShip® Product Suite to be Featured at IRCE
Two innovative fulfillment and delivery products will be demonstrated at ProShip Booth #1657

Brookfield, Wis., May 31, 2016 – ProShip, Inc., a Neopost company, today announced the CVP-500 and ProShip® Product Suite will be showcased at the Internet Retailer Conference + Exhibition (IRCE) from June 7 – 10, 2016.

The CVP-500 is a unique packing system that builds, fills, folds and labels each parcel in one seamless process. It creates a fit-to-size package that uses less corrugated cardboard and eliminates void fill. This innovative packing automation does the work of up to 10 packing stations and can create a parcel every seven seconds. ProShip experts will highlight the CVP-500 at IRCE in ProShip booth #1657 so retailers can see firsthand how this game-changing fulfillment solution can boost their business.

The ProShip® Product Suite is an enterprise-wide, multi-channel shipping and manifesting software solution that is the fastest and most carrier-compliant in the industry. It integrates seamlessly with host systems and features a unified shipping process. This delivery solution is also fully customizable to fit every retailer's needs. ProShip experts will be available at booth #1657 to show retailers how the ProShip® Product Suite can turn shipping into a competitive advantage.

"We are excited to feature the CVP-500 and ProShip® Product Suite at IRCE. Both products are innovative solutions for fulfillment and delivery and offer competitive advantages for retailers who want to increase efficiency and reduce fulfillment and delivery costs," says Mark Aument, Senior Vice President, Sales of ProShip, Inc. "Retailers will be amazed at how these systems can help them exceed customer expectations."
