

Intelligent Asset Management

Benefits

- Low cost: Readers built into smartphones.
- Ease of use: Simple tapping reads the tag.
- Low technology risk for businesses.
- Low implementation cost.
- Simplify operations.
- Automatic saves of the inspectors details and time & date of the inspection.
- Supplied as standard on all CAP Series IR windows.

How does it work

- The phone powers the operation, so no batteries are required.
- Uses the principle of inductive coupling to transfer information between the tag and phone.
- Tag contains memory to store data which can be erased and rewritten as needed.
- Phone “wakes” the tag by proximity.
