

ScytI/ Election Night Reporting

NEW Product Features

The new ScytI Election Night Reporting

An enhanced design and configuration for you, a more personalized and user-friendly visualization of election results for your citizens.

NEW Features

The new **ScytI Election Night Reporting** provides the innovative features requested by our customers, offering election officials a more modern administration page layout and design and citizens an intuitive and familiar experience when navigating and interacting with election results websites.

- **Enhanced access to “my races”:** voter personalization, grouping and quick access to races citizens wish to follow.
- **Improved election summaries:** a wider selection of detailed level and grouping of results such as precinct level, voter turnouts, etc.
- **Enhanced site navigation:** a modernized admin layout and design for simple configuration.
- **Mobile friendly, liquid site:** improved design enabling visualization to adapt to the voters mobile device, no matter the screen size.
- **Easier page customization:** allows system administrators to preview exactly how changes will be displayed to voters.
- **Automated results refresh:** ensures results data viewed by voters is always updated in real-time.

“WITH SCYTIL ELECTION NIGHT REPORTING WE HAVE SIGNIFICANTLY REDUCED THE AMOUNT OF CALLS AND VISITS TO THE OFFICE, FROM THE MEDIA & VOTERS, REQUESTING INFORMATION ON THE ELECTION RESULTS. BEING A SMALL COUNTY WITH A SMALL STAFF, WE ABSOLUTELY LOVE THE ONLINE REPORTING FEATURE BECAUSE WE HAVE MORE TIME TO COMPLETE OTHER OBLIGATIONS.”

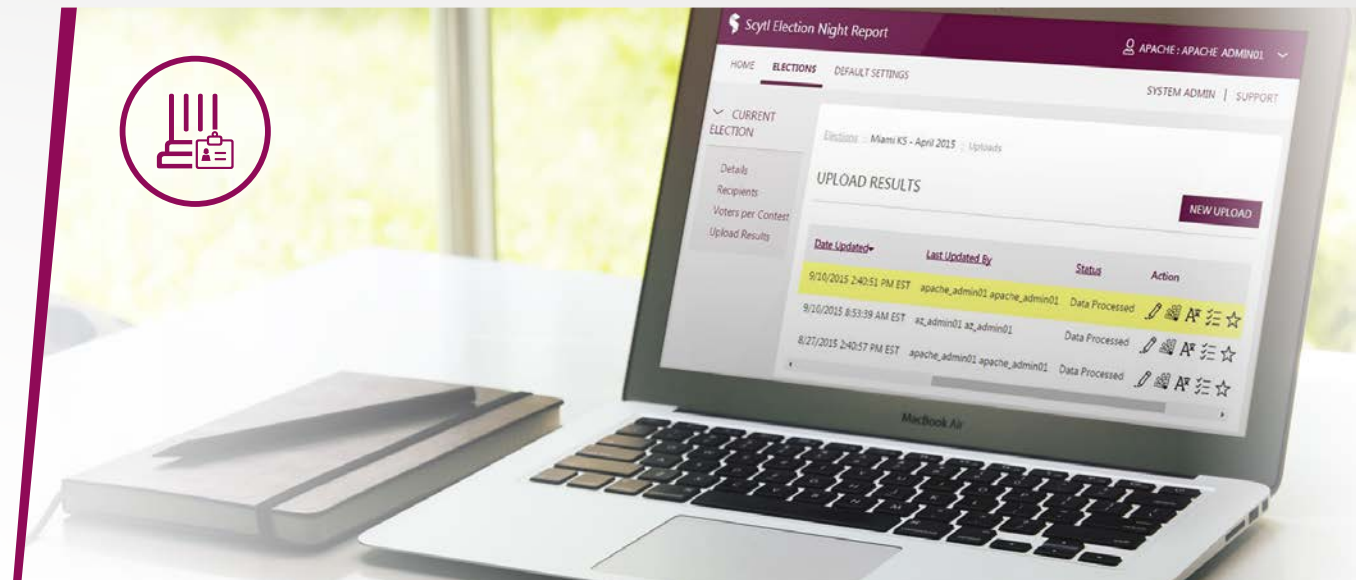

Melanie J. Gilders, Director
Fulton County Board of Elections

For Your Election Office

At **ScytI**, we understand the importance of the timely provision of election results to the public. This important task needs to be executed with accuracy and efficiency.

With the new ScytI Election Night Reporting, in addition to benefiting from the same robust features, your election office will now be able to leverage the new display features and modernized interface for easier accessibility and navigation when preparing for election results publication.

Enhanced Page Customization

With the new In-line editing feature, your election staff can ensure complete accuracy when designing the web display of your election results.

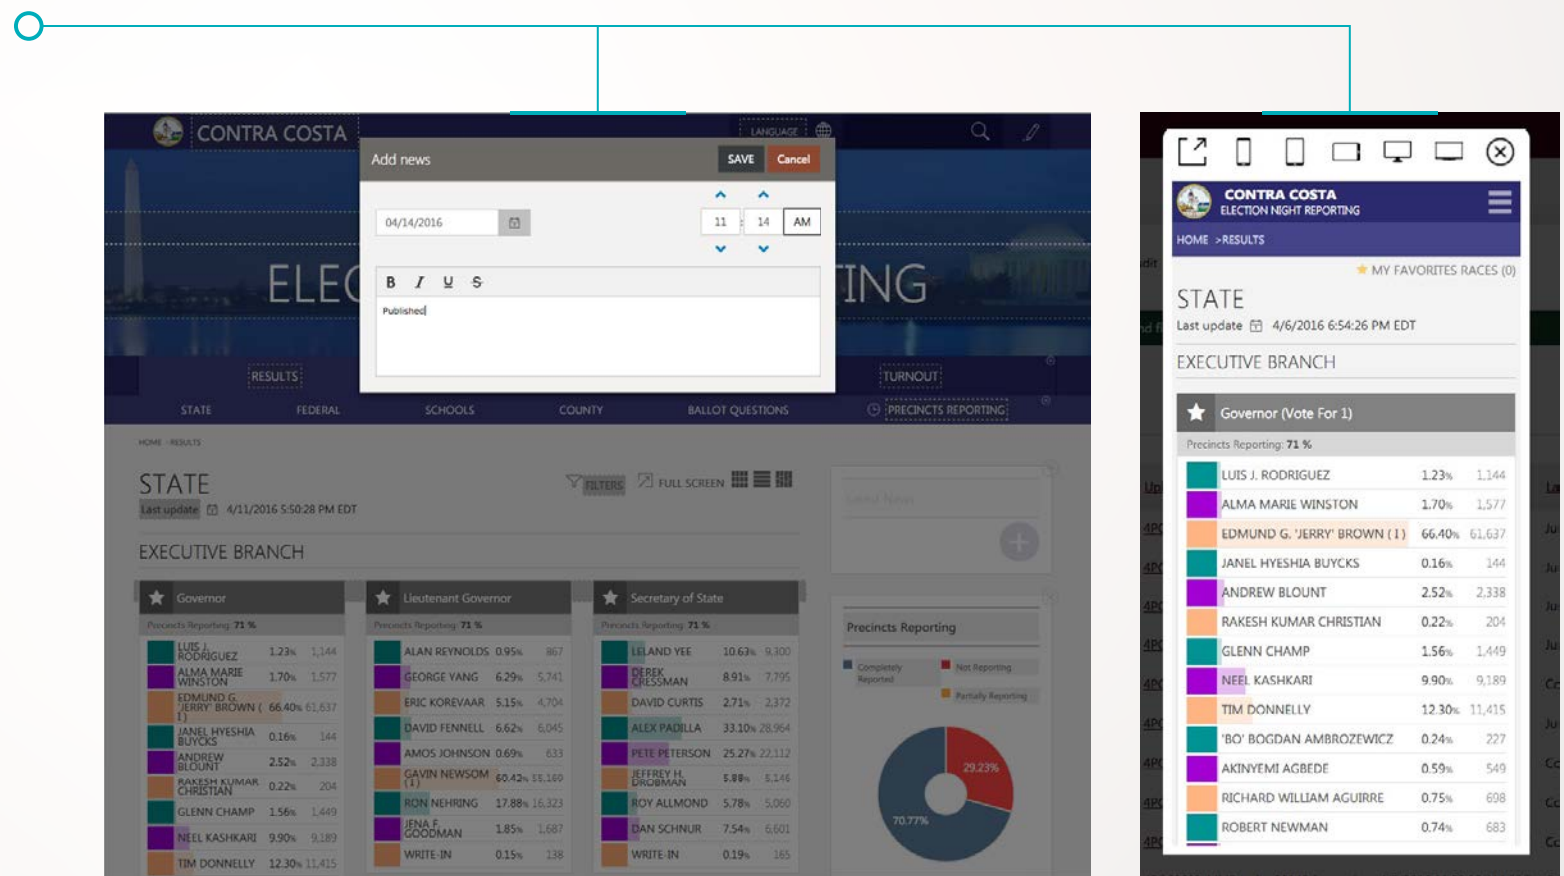

This feature enables election administrators' complete end-to-end visibility and display of their election results on their reporting page. This feature streamlines the proofing of the page and reduces the number of errors and the need for additional uploads.

Streamlined Editing Capabilities

Election offices now have greater configuration and display power of their elections results. Data can be previewed in different formats before publishing on your reporting website.

This new feature ensures the exact presentation of your results is displayed in line with your preferences, greatly reducing the time of bouncing back and forth between public and administrative pages.

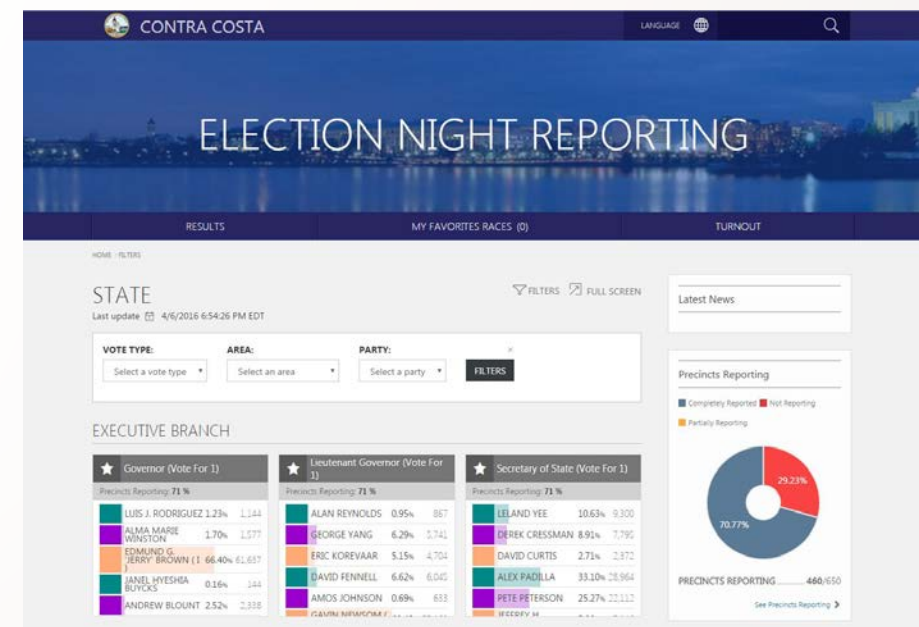

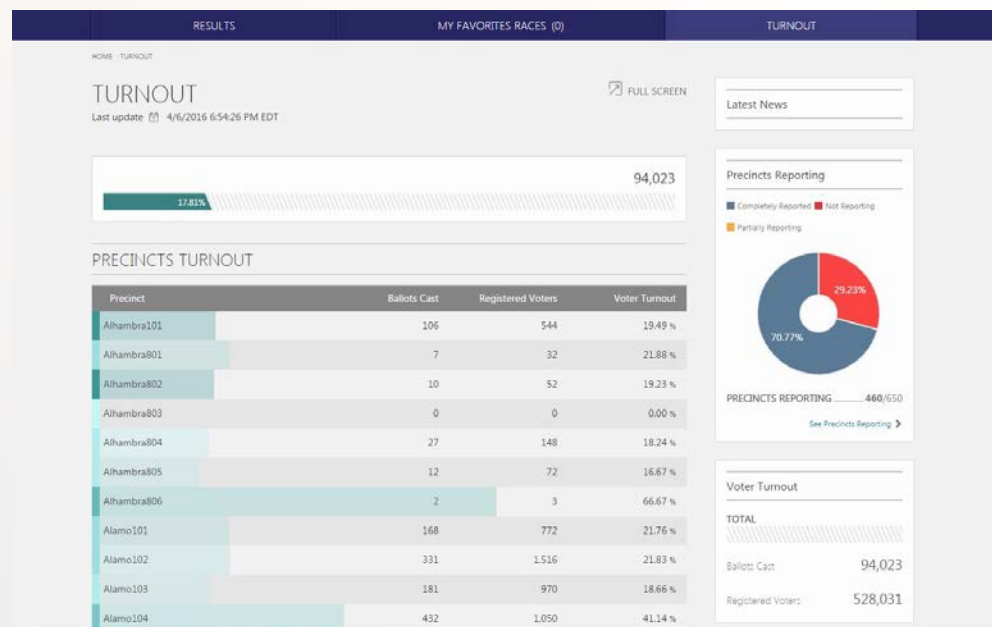

/ For your Citizens

Scytl Election Night Reporting's new features fully encompass new web technology for streamlined navigation and real-time data access of election results on the go.

The trends of how society interacts with web pages and demand for real-time data is increasingly important. Not only are citizens looking for more user-friendly access, but users also want a website they can easily navigate through while mobile.

Results Auto-Refresh and Personalization

The newly designed reporting pages enable citizens with full access to track their own races. This feature allows users to receive updates on specific races they are following.

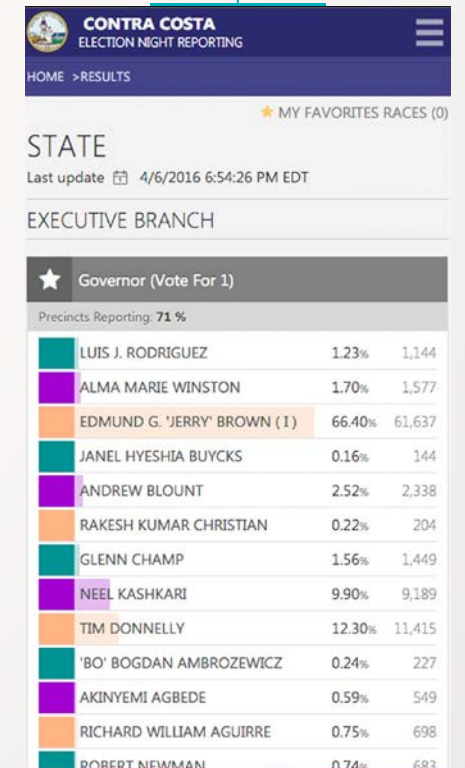

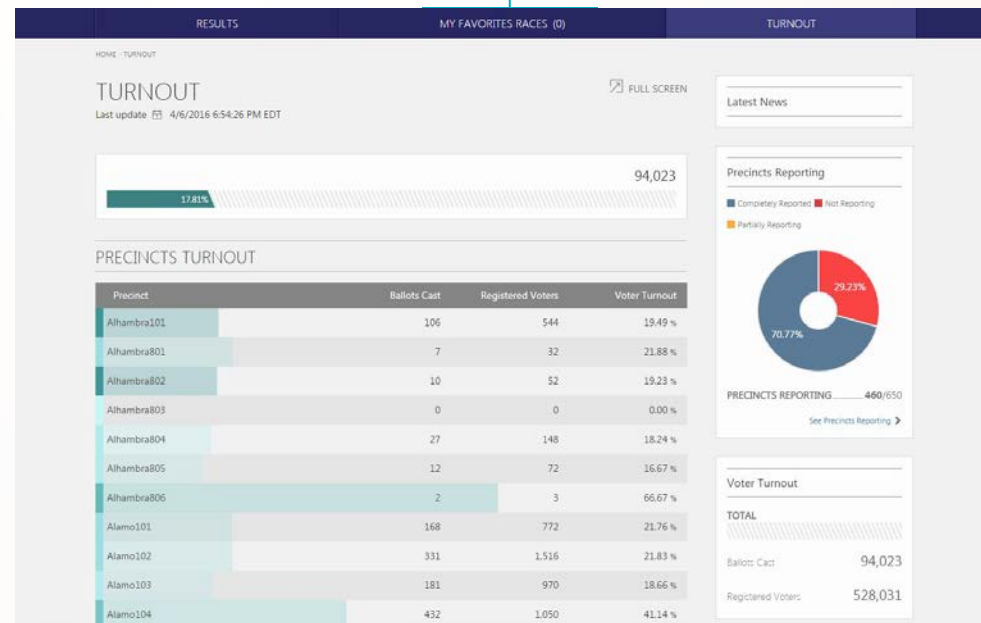

With the new auto-refresh features, citizens will always have the latest update on their election results.

Enhanced Access & Display of Election Results

With the new features, election officials can now categorize contests into familiar groups, which makes them more recognizable to their constituents. Election-level summary data, such as precincts reporting and voter turnout are now far more visually appealing via new graphical representations.

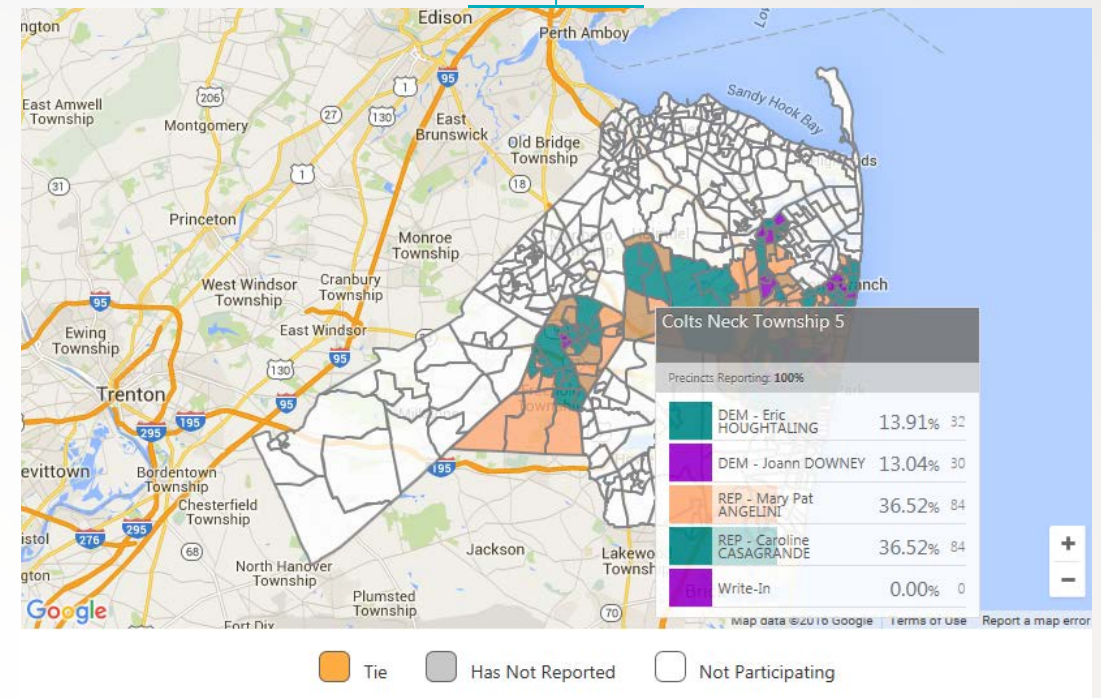

With all of these enhanced features our site is now liquid, meaning your results sites can scale to the screen size of any device.

Additional KML Maps Features & Variations

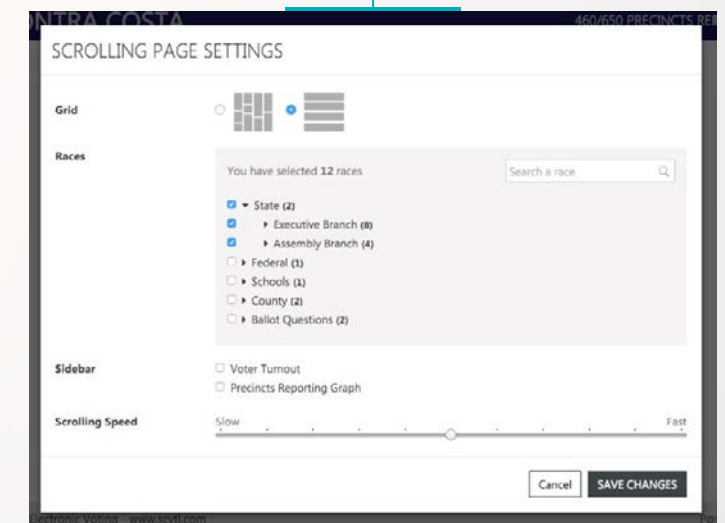

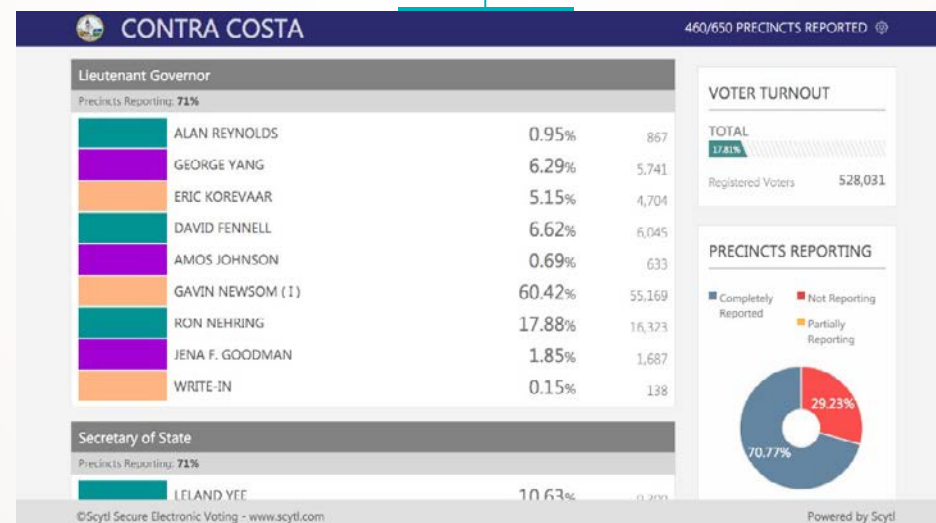

Our new template incorporates a Google Maps feature, which combines layers of election results with the corresponding geographic map.

The variety of map styles provided allows the election office to match the look and feel of their site. In addition, using maps with our full screen functionality allows citizens to benefit to access to results data in a rich and dynamic way.

Scrolling Page Enhancements

Our new scrolling page allows you to adjust the speed at which your citizens scroll and to select between two different display grids as well as allowing for the ability to pick the contests that you wish to show on the page
