

UNDERSTANDING

The Global Impact of DEMENTIA

AND WHAT YOU CAN DO ABOUT IT!

Around the world, there were 9.9 million new cases of dementia in 2015,

one every 3 seconds.

46.8 million people worldwide are living with dementia in 2015.

This number will almost double every 20 years.

Much of the increase will take place in low and middle income countries (LMICs):

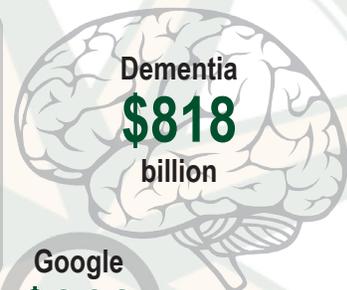

In 2015, 58% of all people with dementia live in LMICs, rising to 53% in 2030 and 68% in 2050.

If global dementia care were a country, it would be the

18th largest economy

in the world exceeding the market values of companies such as Apple and Google.

(Source: Fortune 2015 ranking)

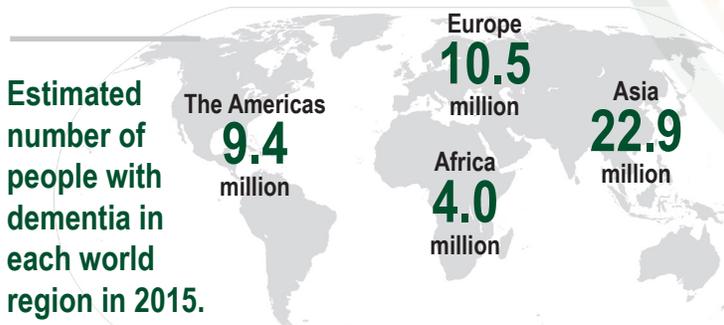

The total estimated worldwide cost of dementia in 2015 is US\$ 818 billion. By 2018, dementia will become a trillion dollar disease, rising to

US\$ 2 trillion by 2030.

With these staggering figures, we need to prepare, on all levels, to deal with the increasing population affected by this disease. We anticipate an increase in legislation pertaining to individuals with dementia so it's imperative you understand how this disease affects our world, our country and our economy.

Mark your calendars for our upcoming presentation by *world renowned dementia expert Naomi Feil* to learn how to care for those with dementia-related diseases. Event held at Dorothy Betts Marvin Theater, located in The George Washington University Marvin Center **September 15, 2016 from 10am to 3pm** in Washington, DC. Over for details.
