

Office 365 SharePoint Made Easy.

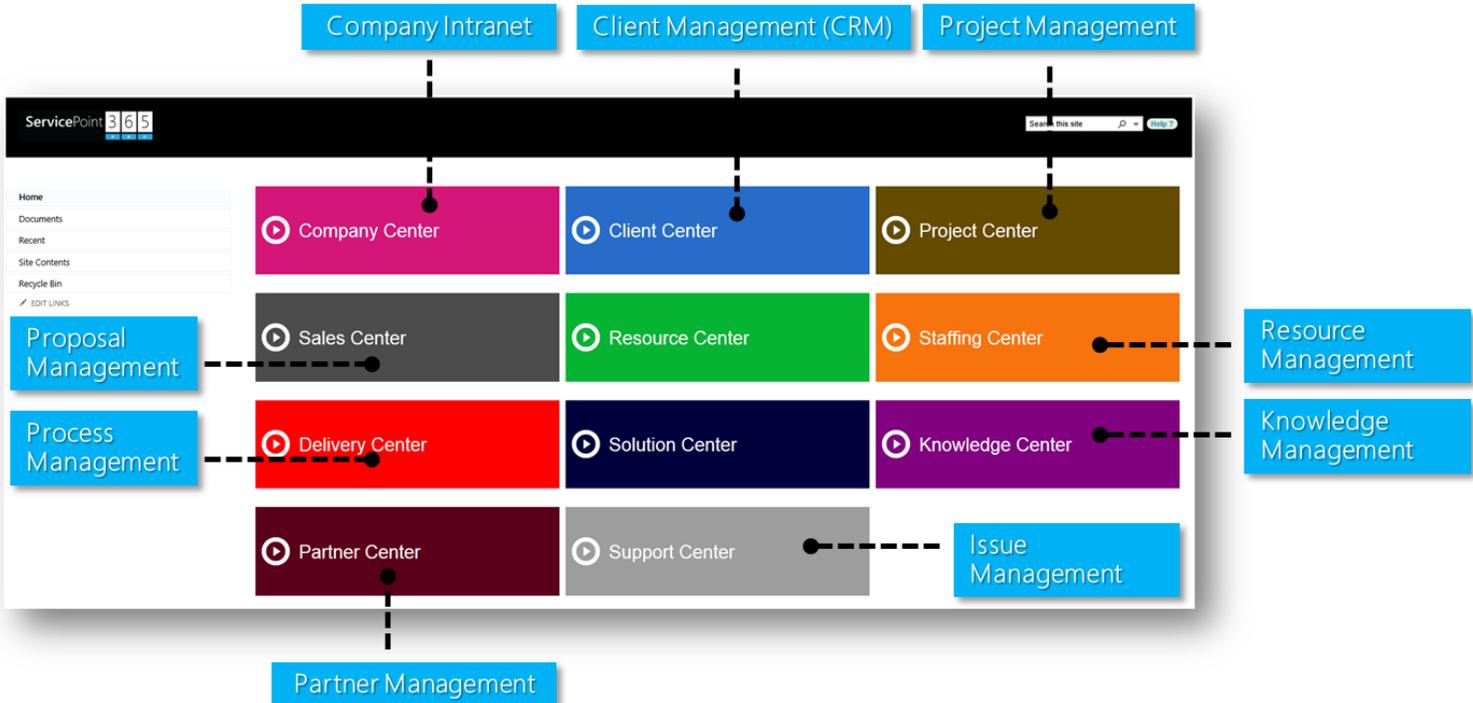

"Even though we were without SharePoint skills in our PMO team, we were able to use ServicePoint365 to quickly begin leveraging SharePoint Online, providing a great framework to organize materials that our team needs on a daily basis to serve our customers efficiently and consistently."

– Betsy Pope, PMO Director

Trying to leverage Office 365 SharePoint Online? If you're like most Office 365 customers and partners, then chances are you've struggled with this issue—and with good reason. After all, setting up a user-friendly SharePoint Online environment can be a real challenge and expense. ServicePoint365 is an Office 365 SharePoint based application designed to help customers and other Microsoft partners unlock the power of SharePoint Online without the need for deep SharePoint skills. ServicePoint365 comes out-of-the-box with an intuitive user interface and information architecture that organizes your content into a structure that makes sense and takes the guesswork out of where information is created and stored.

Key Features:

- **Pre-Configured** – Template approach for key content areas
- **Intuitive Navigation** – Easily find business content
- **Rapid Deployment** – Get up and running fast
- **Minimal SharePoint Skills** – Eliminate need for developers

We've already done the hard work for you. By using ServicePoint365, companies and Microsoft partners have lowered their cost of deploying a user-friendly Office 365 SharePoint environment while significantly improving their internal and external collaboration capability.
