Edison DC Systems expands portfolio with *alseT Hosting*, a leader in on premise managed hosting

(July 15, 2016, Milwaukee, WI) Edison DC Systems announces its newest subsidiary, ***alseT Hosting***, a managed hosting provider utilizing a virtualized environment consisting of high powered enterprise class hardware infrastructure. In 2013, ***alseT Hosting's***, CEO/President, John Meinecke looked at the industry and was disheartened by the high prices that many hosting companies and developers charged customers. ***alseT Hosting's*** mission is to offer better service for a lower cost in order to assist small to medium sized businesses.

alseT Hosting is a premier infrastructure provider with comprehensive service and support levels that strive for 100% customer uptime. The unique platform delivers a powerful yet cost effective cloud hosting solution, as well as several backup and replication offerings. These are specifically tailored to each business's backup retention and disaster recovery needs. ***alseT Hosting*** allows customers to be 100% in control of their data.

In addition, ***alseT Hosting*** provides:

- Virtual Private Servers
- GPU Servers
- Offsite Backup
- Disaster Recovery
- Private Exchange
- Professional Services
