

**Levementum is an award-winning consulting firm that designs, deploys, supports, and cultivates adoption of business-driven technology solutions using the recognized industry-leading software platforms Salesforce and SugarCRM.**

Customer engagement solutions involve much more than CRM, so we always evaluate all potential applications with an unbiased, technology-agnostic approach to determine the best fit and value to suit your immediate and long-term business needs.

With a highly specialized team of customer engagement experts, we help mid-market and large corporate companies to ...

- Create exceptional customer experiences using insight on when to take action.
- Overcome siloed information by gaining visibility to the complete customer journey—across channels and over time.
- Shorten the buying cycle by identifying opportunities to accelerate the journey.
- Increase loyalty, retention, advocacy, average order value, and ultimately, customer lifetime value.

***Levementum sees successful CRM as “two parts people, one part technology.” With Levementum’s expertise, clients can recognize the full potential of their investment.***

### Strategy
