SUPERMARKET

THE SUITE

Store Management Suite (SMS) is a client-based software solution that provides regional and national retailers with seamless, integrated management of the point of sale, back office, corporate office, warehouse and all aspects of the retail enterprise. The suite contains modules that are typically outsourced, and ensures all necessary data is shared when, how, and with whom needs it. Instant connectivity, anywhere in the enterprise, is reality.

THE TECHNOLOGY

The core of SMS is built upon basic retail fundamentals: buy effectively, sell profitably, manage efficiently. That foundation is rooted in solid, proven industry standards designed to offer the protection you require and the flexibility you demand. Our architecture ensures undeniable reliability, a robust feature set, and speed. The system can also be personalized without changing source code, so customization has never been easier, nor more stable. Now you too can have a solid enterprise wide retail management system designed around your unique needs.
THE OFFER

As traditional points of input converge with more mobile consumer products, applications and interfaces must adapt. SMS is the premier, fully connected platform bridging yesterday with the future of retail, going beyond traditional purpose built machines, offering interactions wherever and whenever they make most sense.

As retailing evolves, managing the merger of brick-and-mortar with virtual outlets becomes essential. It is now about interconnecting all those points, linking your enterprise to your employees to your processes to your customers.

Understand. Deliver. Thrive. That's modern retailing. That's SMS.
