

CLIENTS SUCCESS STORY

International Law Firm Seeks Small Company for Durable and Defensible eDiscovery Data Copy Tool

Dorsey and Whitney LLP, founded over 100 years ago and as one of the 100 largest law firms in the United States, provides superb litigation and eDiscovery services to diverse industries, including Food & Agribusiness, Health Care, Mining & Natural Resources, and more. Dorsey has been recognized for workplace equality and inclusivity, earning a 100% score on equality index for Human Rights Campaign 2016 and rated as one of 50 best law firms for women by the Working Mother Media & Flex- Time Lawyers organization. This firm is committed to providing quality customer service and is dedicated to pro bono efforts.

As a Litigation Technology Services Manager at Dorsey, Trina Gray manages productivity workflow and implements new strategies for handling eDiscovery tasks. To tackle difficult scenarios, she effectively uses her knowledge and expertise on rapid industry growth, which she gained over 23 years in litigation practice.

Upon her arrival at Dorsey, Trina insisted on purchasing a valuable tool, Pinpoint Labs' SafeCopy, which she had come to rely on at a

previous company due to its' reliable metadata capabilities, including time stamp, chain of custody, and MD5 hashing. Her superiors quickly purchased licenses for Pinpoint Labs' SafeCopy for its' reputation, affordability, and durability.

"My team is instructed to use SafeCopy at all times to copy client data whether one file or 2 terabytes of information on a hard drive needs to be copied securely. Bottom line, the program is efficient to run."

-Trina

For large data sets, Trina and her team create a directory of a piece of media, cull down the directory list, stage and copy the hard drive using SafeCopy, and conclude by processing copied data into Dorsey's review platform. "Typically, I tell clients that staging and copying occurs at a rate of 8GB/hour, but if the collection contains larger files instead of several small files, SafeCopy copies at a much faster rate. The time frame can be hard to predict due to varied environment controls," Trina explained.

Dorsey continues to be a valuable client of Pinpoint Labs' SafeCopy due to its reliability and extensive reporting capabilities. "I have recommended this product to everyone who needed to securely move client data. Because the product and client support are great, it has been a phenomenal investment and essential to our eDiscovery success," Trina said.
