Complete Web Security Software Solution

CyBlock Web Security Software provides advanced Web filtering, threat protection, comprehensive reporting, and simplified management.

Advanced Web Filtering

- Configure policy exceptions for different users and groups.
- Filter by standard, cloud service, and unlimited custom categories.
- Implement flexible, scheduled filtering by day, hour, or half hour.
- Use white & black lists to restrict or allow access to certain sites.

Threat Protection

- Keep out malware, Trojan horses, spyware, phishing attacks, and more.
- Identify and stay ahead of a growing number of malware sites.
- Inspect or "tunnel" HTTPS by Web site, category, or user ID.
- Prevent crashes, slowdowns, and information theft.

Bandwidth Management

- Ensure speed and reliability of mission-critical Web activity.
- Cap bandwidth or block nonessential categories with policies.
- Configure total-usage thresholds to dynamically trigger caps.
- Get e-mail alerts and limit bandwidth usage when thresholds are exceeded.
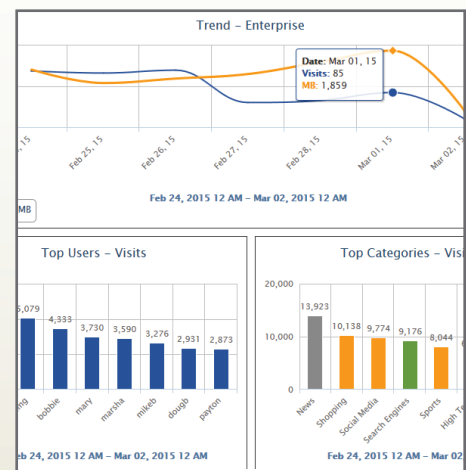

Cloud Services Detection and Analysis

- Discover all cloud applications being accessed in your organization.
- Expose both corporate sanctioned and employee-introduced cloud services.
- Identify risk, and analyze usage of your network resources.

Comprehensive, Manager-Ready Reports

- Comply with government and industry regulations such as CIPA and HIPAA.
- Use CyBlock Dashboard for quick, high-level assessments.
- View time spent online and compare trends by date range.
- Get a variety of high-level summaries and detailed audits.
- View all user searches, unacceptable visits, and cloud service usage.
- Schedule reports for automatic distribution.
- Synchronize cloud user activity with Hybrid option.

Dashboard

Technical Advantages

- **Directory Support.** Synchronize CyBlock with AD or another directory.
- **Automatic Daily List Updates.** Stay on top of the latest Web 2.0 trends.
- **Installation Options.** Choose from multiple software installation approaches.
- **Minimal-Effort Administration.** Administer through the browser with ease.
- **Array Configuration.** Manage multi-location configurations from one server.
- **Virtual Machine (VM) Support.** Work in a VM environment.
- **Multi-Copy Support.** Deploy multiple installations under 1 license.
- **Hybrid Cloud Option.** Safeguard all employees in the organization.
- **Support.** Access our knowledgeable support staff and services for free.

Minimum System Requirements

- **Processor:** 2 GHz
- **Memory:** 2 GB RAM
- **Hard Disk:** 500 MB free disk space depending on log file storage needs
  Note: For evaluation purposes, a Windows XP Professional, Windows Vista Business Edition, or Windows 7 workstation may suffice if you intend to test with less than ten users. These workstations will not allow more than ten concurrent connections. This is a limitation of Microsoft, not Wavecrest Computing products.

Supported Operating Systems

- **Windows:** Windows Server 2012/2008/2003
- **Linux:** Red Hat, Fedora, CentOS, and Ubuntu
  Note: Contact Wavecrest Technical Support for additional Linux support.

Installation and Evaluation Support

When needed, Wavecrest provides consultation and advice via telephone or e-mail at no charge during the free trial period.

Pricing

CyBlock is a licensed, subscription-based software product. Pricing is tiered, based on the number of personnel ("nonconcurrent users") to be monitored. In general, the price-per-user decreases as the number of users goes up. Every CyBlock purchase includes:

- No-charge, U.S.-based technical support for the lifetime of your license
- Daily URL List updates
- Free product upgrades
- 90-day money back guarantee

Discount pricing is available for government agencies, educational institutions, nonprofit organizations, and resellers. For more information, contact Sales at 321-953-5351, Ext. 3.

Since 1996, Wavecrest Computing has provided business and government clients with reliable, accurate employee Web-access security, employee Web-use monitoring and analytics, and Cloud Access Security Broker (CASB) solutions. IT specialists, HR professionals, and business managers trust Wavecrest's Cyfin® and CyBlock® products to manage employee Internet usage with today's distributed workforce in mind–reducing liability risks, improving productivity, managing cloud services, saving bandwidth, and controlling costs.

Wavecrest has over 3,000 clients worldwide, including Blue Cross Blue Shield, MillerCoors, National Grid, Rolex, Siemens, Superior Court of California, U.S. Dept. of Veterans Affairs, and a growing list of global enterprises and government agencies. For more information on our company, products, and partners, visit www.wavecrest.net.
