

# Press Release

## Rigaku Oxford Diffraction to exhibit at 2016 European Crystallography Meeting

**August 11, 2016 – The Woodlands, TX** [Rigaku Corporation](#) is pleased to announce its attendance at the 30th European Crystallography Meeting ([ECM-30](#)), taking place August 28 through September 1, 2016 at the [Congress Center](#) in Basel, Switzerland.

ECM-30 will be a four-day scientific meeting offering numerous learning opportunities in current areas of crystallography. At the meeting, crystallographers and researchers with interests in crystallography and crystal growth will share their scientific views and new achievements. The event will include workshops and user meetings, lunch meetings, and a social program, enabling scientists from across Europe and the world to connect and exchange ideas.

[Rigaku Oxford Diffraction](#) is presenting its single crystal X-ray diffraction solutions, designed to address small molecule crystallographic requirements. Rigaku will also be promoting its diverse lines of [X-ray diffraction](#) (XRD) instrumentation, including the latest [powder crystallography](#) systems and stress analyzers. Rigaku will be exhibiting its products and performing demonstrations at Booth # C30.

### About Rigaku

Since its inception in Japan in 1951, Rigaku has been at the forefront of analytical and industrial instrumentation technology. Rigaku and its subsidiaries form a global group focused on general-purpose analytical instrumentation and the life sciences. With hundreds of major innovations to their credit, Rigaku companies are world leaders in X-ray spectrometry, diffraction, and optics, as well as small molecule and protein crystallography and semiconductor metrology. Today, Rigaku employs over 1,400 people in the manufacturing and support of its analytical equipment, which is used in more than 70 countries around the world supporting research, development, and quality assurance activities. Throughout the world, Rigaku continuously promotes partnerships, dialog, and innovation within the global scientific and industrial communities.
