

Learn About Protecting Legal Data with TruShield Security Solutions, Inc. at ILTACon 2016

TruShield creates compelling case for increased cybersecurity in the legal industry

Dulles, VA (August 15, 2016): TruShield Security Solutions, Inc., is a leading cybersecurity solutions company that will showcase the latest innovations in data privacy and threat prevention to the legal field when they exhibit at the International Legal Technology Association's Annual Conference from August 28th - September 1st in Maryland.

While no business is immune from data privacy issues, the legal industry has an even greater responsibility to keep their client's information secure. The increasing exploitation of gaps in cybersecurity is not only concerning but can be potentially devastating to a firm's reputation. According to an *ABA Legal Technology Survey* 50% of law firms are infected with viruses, spyware, or malware. TruShield provides businesses with concrete and innovative solutions to cybersecurity problems that keep clients ahead of the curve.

TruShield's VP of Global Sales, Wesley VanDenburg really underscores the importance of educating the legal community about the rising threat to data privacy, "We are excited to be exhibiting at such a great event. As a Gold Sponsor for ILTA, we know how informative and illuminating their conferences are. The conference this year has a big emphasis on cybersecurity, and we welcome the opportunity to show the legal industry how our solutions can solve their cybersecurity needs."

The TruShield team of experts will be at booth #210, and [private demos](#) with the team can be scheduled on Wednesday, August 31st. Please note that demo spaces are limited. To learn more about data security before ILTACon, [download the TruShield data sheet](#) and find out what every firm needs to do to keep important business and client data safe.

In addition to exhibiting at the conference, TruShield is sponsoring the ILTACon Farewell Beach Party on September 1st. Don't forget to follow #ILTACON and visit www.iltacon.org to keep up on the latest conference details.

###
