

Rigaku to present latest X-ray analytical instrumentation at 2016 ACS Fall Conference

Rigaku Corporation
9009 New Trails Drive
The Woodlands
Texas 77381 USA

Rigaku will showcase its XRD, XRF and Raman technology at the 252nd American Chemical Society National Meeting & Exposition in Philadelphia

August 19, 2016 – The Woodlands, TX. [Rigaku Corporation](#) will be presenting its diverse lines of X-ray diffraction (XRD), X-ray fluorescence (XRF) and Raman spectroscopy instrumentation at the [2016 ACS Fall Meeting](#), Monday, August 21 through Friday August 23, 2016. The event is organized by the American Chemical Society and will be held at the Pennsylvania Convention Center in Philadelphia, PA.

ACS National Meetings provide researchers with current scientific, professional and product information news through various poster sessions, exhibitions, seminars and networking events.

Rigaku, a global leader in X-ray analytical instrumentation, will be exhibiting at the event at booth #527. ACS National Meetings provide researchers with current scientific, professional and product information news. The theme for the Fall event is: “Chemistry of the People, by the People, for the People.”

Analytical and industrial instrumentation from Rigaku range from benchtop devices, suited for researchers employing X-ray techniques, to high-end instruments with advanced analytical capabilities.

Among the instruments on display at the event will be the [Rigaku XtaLAB mini](#) benchtop chemical crystallography system. The XtaLAB mini™ system is a compact single crystal X-ray diffractometer designed to produce publication-quality 3D structures. The system is designed to provide the same quality data as a larger 3 kW X-ray system, but with reduced size afforded by the generator’s lower operating power (600 W).

Also featured at the event will be the fifth generation [Rigaku MiniFlex](#) benchtop X-ray diffraction (XRD) instrument. The MiniFlex is a general purpose X-ray diffractometer that can perform qualitative and quantitative analysis of polycrystalline materials

More information about the MiniFlex benchtop X-ray diffractometer is available at www.myminiflex.com.

About Rigaku

Since its inception in Japan in 1951, Rigaku has been at the forefront of analytical and industrial instrumentation technology. Rigaku and its subsidiaries form a global group focused on general-purpose analytical instrumentation and the life sciences. With hundreds of major innovations to their credit, Rigaku companies are world leaders in X-ray spectrometry, diffraction, and optics, as well as small molecule and protein crystallography and semiconductor metrology. Today, Rigaku employs over 1,400 people in the manufacturing and support of its analytical equipment, which is used in more than 70 countries around the world supporting research, development, and quality assurance activities. Throughout the world, Rigaku continuously promotes partnerships, dialog, and innovation within the global scientific and industrial communities.
