

PRESS RELEASE

Stertil-Koni Introduces Low Profile Adapter for Lifting Light Duty Vehicles with Two Mobile Columns – Delivering Wheels-Free Access

For Immediate Release

Stevensville, MD, August 24, 2016 -- Heavy-duty vehicle lift leader Stertil-Koni has just introduced a new ALI certified, low profile light truck adapter specifically engineered for a broad range of light duty vehicles with minimal ground clearance, including pickup trucks, SUVs and vans.

Raising a vehicle in this manner – front and rear lifting – requires only two mobile columns and provides true wheels-free access to the undercarriage of the vehicle – including wheels and tires.

Here's what's really special: The new Stertil-Koni light truck adapter has a wide reach and a very short standing height, allowing it to fit under a greater range of vehicles, thereby overcoming the inherent limitations of many existing adapters. "What's more," noted Peter Bowers, technical sales manager for Stertil-Koni, "height extensions and pads can be added to the adapter to suit various vehicle heights. These features make the adapter well suited for passenger cars, pickup trucks and non-revenue fleets, among others."

Because the adapter can easily be attached to existing mobile columns, maintenance shops can significantly increase the range of vehicles they are able to service without making a major investment or having to buy new vehicle lifts. Each adapter has a capacity of 5,500 lbs. or 11,000 lbs. per pair.

Concluded Bowers, "Speed, efficiency and safety are essential to achieving top performance in today's busy vehicle maintenance shops. That's why lifting light duty vehicles using only two mobile column lifts is especially opportune in today's highly competitive facilities."

Stertil-Koni's Low Profile Light Truck Adapter is well-suited for light-duty vehicles with minimal ground clearance.

About Stertil-Koni

Stertil-Koni, a brand of the Stertil Group, is the global market leader in heavy duty vehicle lifts – [bus lifts](#) and [truck lifts](#) – and is the preferred supplier to the world’s leading companies in the truck and bus industries. Stertil-Koni’s breadth of products meets all ranges of lifting needs and includes [mobile column lifts](#), two-post, four-post, in-ground piston lifts, platform lifts, half-scissors and its innovative axle-engaging, in-ground, scissor lift configuration, ECOLIFT. The DIAMOND LIFT is now available in a “frame” version, engineered specifically for concrete foundations and ideal for replacement situations. Stertil-Koni USA is headquartered in Stevensville, Maryland and is the official sponsor of National Lift Week, which takes place October 3-8 in 2016. Stertil-Koni has production facilities in Europe, in The Netherlands, and in the USA in Streator, Illinois.
