G akkadian Global Directory (aGD)

Find who you need, faster.

In today's agile workforce, locating users quickly from all your communication devices is critical. akkadian Global Directory (aGD) not only provides a simple and powerful directory for your Cisco Unified Communications devices and applications, but extends this functionality to your mobile iOS and Android devices, providing a unified directory experience no matter where you are.

Why is aGD a must-have?

aGD is simple:

- ✓ Fully productized Linux virtual appliance
- ✓ Drag & drop interface customization
- ✓ T9 (predictive text) search

aGD is powerful:

- ✓ Synchronizes and combines data from multiple sources
- ✓ Provides a unified directory experience across Cisco phones, Jabber, iOS and Android devices, as well as web browsers
- ✓ Provides directory search analytics

aGD is flexible:

- ✓ Directory dial rules to facilitate complex dial plans
- ✓ Supports multiple CUCM clusters
- ✓ UDS support for Cisco DX series video devices
- ✓ Offers directory management via a web interface

aGD At-a-Glance

akkadian Global Directory allows employees to easily access their company directory from multiple devices.

"The software is fantastic – simple to install, configure, and use."

Phil Nevins
Infrastructure & Voice Lead Engineer, Dentons US LLP

G akkadian Global Directory (aGD)

"We had C-level people who could not find other C-level people through the native directory. There was no way to look them up via the phone. Now, they can search via akkadian Global Directory and find anyone. Problem solved. Easy sell. Time is money."

Phil Nevins
Infrastructure & Voice Lead Engineer
Dentons US LLP
