

# TESTLAB 4 APPS

## APP TESTING

We test your apps and web portability using emulators, simulators and a rich set of the latest real devices (Android, iOS, Windows Phone).

## BETTER THAN IN-HOUSE

### USABILITY

Assess app easiness and attractiveness

### FUNCTIONAL

Complete testing based on the specifications analysis

### SYSTEM

Verify utilization of hardware resources

### PERFORMANCE

Determine application efficiency

### NEGATIVE

Apply negative test scenarios

### EXPLORATION

Determine overall quality level

### REGRESSION

Test the modified application

### STRESS TESTING

Check application stability

### BUILD ACCEPTANCE

Evaluate crucial functions and processes

### USER INTERFACE

Validate application GUI

- Unbiased, independent testing service
- Professional reporting and analysis
- Permanent access to latest devices and releases
- Effective regression across wide range of devices
- Automation saving valuable manual testing time
- Actual devices and network for real user experience
- Structured approach avoiding "ad-hoc testing" gaps
