

Version 8.0 is here!

100% BCM software never looked so good.

Version 8.0 offers new, pinpointed screens and clean navigation across any device to complement the power and flexibility of ResilienceONE® by Strategic BCP—the most simplified user experience in the BC/DR industry.

The screenshot displays the main dashboard of ResilienceONE. At the top, there's a navigation bar with 'Lambcock, James | Help | Logout' and dropdowns for 'Region 2' and 'Business Unit'. Below this is a 'My Tasks' section with a table listing tasks like 'Add/Update Activities & Critical Periods' and 'Add/Update Total FTEs'. The table columns include ID, Task Name, Status, Percent Complete, Project Name, Due Date, Mark Done, and Go To Screen. Below the tasks is a 'My Plans/Plan Approvals' section showing a table with columns for Doc State, Last Action, Document Title, File Name, Department, Last Updated, Updated By, and Control #. At the bottom, there are two 'Quick Plan Generator' sections: 'Business/IT Quick Plan Generator' and 'Crisis Management Quick Plan Generator', both with search and filter options.

PLAN DEVELOPMENT.
With just one click, users can easily access their tasks, generate consistent plans, and route them through approval workflows—with no setup required.

This screenshot shows a 'Task Details' window for a task named 'Add/Update Staff/Recovery Resp Table'. It includes fields for Project Name, Task ID, Start Date, and End Date. Below this is a 'Screen' section with instructions for recovery. The main part of the window is a large table representing a Recovery Time Objective (RTO) matrix. The columns represent different recovery timeframes: 'Immediately', '0 HOURS', '15 HOURS', 'NEXT DAY', '48 HOURS', '72 HOURS', '1 WEEK', '2 WEEKS', '3 WEEKS', '4 WEEKS', and 'OVER 4 WEEKS'. The rows represent different components like 'Site/Role', 'Vendor/Third Party', and 'Accommodated Logistics Group'. The cells in the matrix contain numerical values representing RTOs. A 'Recovery Note' column is also present on the right side of the matrix.

TASK WIZARDS.
As tasks are assigned to users, a built-in Wizard is automatically generated making setup seamless for administrators.

The screenshot shows the 'B3 - Operation Blueprints' screen. It features a sidebar with navigation options like 'PLAN DEVELOPMENT BOARD', 'MY SCREENS', 'MY TASKS', 'PROJECT MANAGEMENT', 'DRAG & DROP REPORTING', 'SYSTEM REPORTS', 'USER ADMINISTRATION', and 'DATA ADMINISTRATION'. The main content area is divided into two sections. The left section is for 'Deliverables/Activity Outcome Step' with a table and an 'Add Deliverable/Activity Outcome' button. The right section is for 'Deliverables/Activity Outcome' with a table listing items like 'Total FTE Count = 200', 'Formal Client Regulatory Service Level Agreements', 'Benefits Review', and 'Primary Member & Dependent Lookup'. Each item in the table has 'Edit' and 'Delete' buttons.

CLEAN LOOK & FEEL.
ResilienceONE's new user interface is simply intelligent. Ease of use and the unmatched power of one.

Version 8.0 also includes functionality enhancements to many popular ResilienceONE features.
