

# FORC-EZ7 EasySplicer

CLAD ALIGNMENT V-GROOVE FUSION SPLICER

## About EASYSPLICER FORC-EZ7

### The FORC-EZ7 Splicer Is Small In Size But Big In Value At Only \$2099

The EasySplicer from FiberOptic Resale is the newest fusion splicer on the market. Recommended for FTTH installers, fiber installers, electrical contractors, training schools and more. With only 3 buttons the EasySplicer FORC-EZ7 is simple to use and weighs in at only 4.3 pounds / (3.9 x 9.1 x 2.3 in) with a splice time of under 7 seconds.

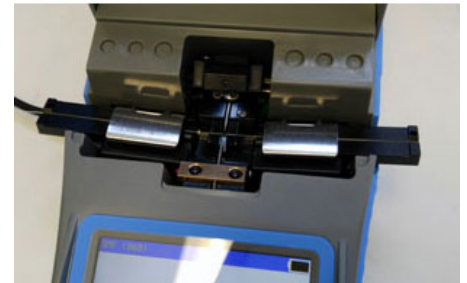

The EasySplicer is constantly calibrating itself for environmental changes, like moisture. Calibration can be performed manually and is easily done within seconds. To make perfect splices calibrate before the start of each work day.

The EasySplicers FORC-EZ7 V-groove splicer has the same splicing method as a ribbon splicer which allows the splicer to keep its size small and cost low. Although the EasySplicer FORC-EZ7 is one of the most inexpensive splicers on the market it performs 4-5 times better than more expensive splicers.

### Easy To Use

The FORC-EZ7 has only 3 buttons and just one button is used for splicing.

It's really that simple!

- Splices Singlemode and Multimode Like Fibers
- Completes splices in just 7 seconds
- Provides Loss Estimation and a Pull Test
- Built in Splice Sleeve Oven
