quicklaunch™ SE

Welcome to **Better Meetings**.

Welcome to
Quicklaunch™ SE

Quicklaunch™ SE is the easy to use multi-platform , one-click/one-touch application to start applications, access data, play media, and showcase your organization's content.

Quicklaunch™ SE provides a consistent and secure interface for your meeting rooms that is incredibly easy to use, saving you time and increasing your productivity. Easily switch between the persistent toolbar and desktop view with customized and tiered buttons.

For IT departments, it reduces training and support cost by providing a secure and manageable interface. Best of all, Quicklaunch™ SE is built with security in mind. Unlike meeting room applications that unknowingly leave behind temporary files with sensitive data. Quicklaunch™ SE keeps your confidential data secure with the 'Room Reset' feature that restores meeting room devices to a clean state, and deletes all sensitive data before the next group meets. Quicklaunch™ SE also has an optional lockdown mode for your Quicklaunch device for enhanced security.

With Quicklaunch™, your meeting space is always ready to join or create new meetings using multiple platforms with a simple touch. Quicklaunch™ is more than just a system to join meetings with one-touch. It seamlessly brings multiple technologies together into a single application, enabling collaboration rather than complicating it.

Quicklaunch™ 'One-Touch'

- Start Multiple Collaboration Applications
- Launch Applications
- Access Corporate Data
