

Rigaku Analytical Devices to Feature Latest Handheld Raman at CPhI Worldwide 2016

Rigaku Corporation
9009 New Trails Drive
The Woodlands
Texas 77381 USA

Rigaku Analytical Devices will be in attendance at the 2016 CPhI Worldwide meeting in Barcelona, Spain, presenting their latest handheld and portable analyzer, Progeny™.

September 24, 2016 – Wilmington, MA [Rigaku Corporation](http://www.rigaku.com) is pleased to announce its attendance at [CPhI Worldwide](http://www.cphiworldwide.com) taking place 4th-6th October, 2016 at Fira de Barcelona Gran Via, Barcelona, Spain.

[Rigaku Analytical Devices, Inc.](http://www.rigaku.com) is presenting its handheld and portable Raman analyzer in Stand #2F73. The [Rigaku Progeny](http://www.rigaku.com) 1064nm handheld Raman analyzer is designed for rapid and accurate chemical identification, verification and authentication applications. The analyzer enables identification of the largest number of pharmaceutical raw materials and finished goods because of minimized sample-induced fluorescence interference known to plague other handheld Raman systems utilizing 785 nm excitation sources. Using Progeny 1064nm handheld Raman spectrometer, pharmaceutical manufacturers can streamline workflow processes, resulting in time and cost savings benefits, providing a rapid return-on-investment. Progeny's CompleteID™ software is compliant with 21 CFR Part 11, EP Revised Chapter 2.2.48, USP 37, and UK MHRA GMP Data Integrity guidelines and regulations. Progeny handheld Raman will be demonstrated in Rigaku's stand.

The Rigaku Progeny advanced handheld Raman spectrometer

CPhI is an established pharmaceutical industry event with over 26 years' experience of bringing together niche providers and top buyers with sellers. The CPhI community includes all functions throughout the pharma supply chain.

About Rigaku

Since its inception in Japan in 1951, Rigaku has been at the forefront of analytical and industrial instrumentation technology. Rigaku and its subsidiaries form a global group focused on general-purpose analytical instrumentation and the life sciences. With hundreds of major innovations to their credit, Rigaku companies are world leaders in X-ray spectrometry, diffraction, and optics, as well as small molecule and protein crystallography and semiconductor metrology. Today, Rigaku employs over 1,400 people in the manufacturing and support of its analytical equipment, which is used in more than 70 countries around the world supporting research, development, and quality assurance activities. Throughout the world, Rigaku continuously promotes partnerships, dialog, and innovation within the global scientific and industrial communities.
