Modern Project
Portfolio Management

"All things are created twice; first mentally; then physically.
The key to creativity is to begin with the end in mind, with a vision and a blue print of the desired result."

~ Stephen Covey

Modern Project Portfolio Management

Why us, as your trusted Project Portfolio Management Partner?

EPC Technologies' vision and blue print offers your project-driven organisation with an accelerated, modern Project Portfolio Management (PPM) IT Solution.

EPC Technologies consist of consultants that helped build Oracle PPM Cloud, and has participated in providing feedback for Cloud Application.

We deliver unparalleled customer service through building strong, long-lasting relationships with our clients and breakthrough innovation.

By drawing upon our extensive Project Portfolio Management consulting experiences, our remarkable flexibility and scalability, we focus on delivering optimal solutions in the least time possible, through collaboration, knowledge sharing and improved efficiency.

Oracle Cloud Project Portfolio

Oracle Project Portfolio Management Cloud

Project Portfolio Management Cloud is a complete and integrated solution which dramatically improves the way project-driven organizations work, enabling efficient and effective project management while ensuring smarter business decisions based on a single source of project truth.

Oracle Project Portfolio Management Cloud

Features:

- Bill faster with flexible, contract management-based project billing that works independently from project planning and execution. Gain comprehensive control over contract terms, rates, and limits - including when to recognize revenue and generate invoices.
- Delivers project billing without rigid project funding constraints, for more efficient contract management and faster billing.
- Gain control of contract compliance. Comply with your customers' terms and conditions while establishing an independent project billing structure.

Features:

- Streamline and standardize project financials with complete, integrated financial planning, budgeting, forecasting and cost capture.
- Manage project financials and budgets more efficiently with an intuitive user interface for simplified - yet extensive - financial planning and control.
- Automate financial planning processes for improved project management. Eliminate disparate, disconnected spreadsheets.

Features:

- Grants management solution helps you gain absolute control and visibility into how funds are spent to support third-party-sponsored projects and programs.
- Streamline awards management processes - from initial funding to close out - using an integrated and collaborative platform.
- Boost grants management productivity. Spend less time on administrative details and paperwork - and more time on strategic tasks.

Features:

- Identify and place the best-suited people on each and every project with innovative and intuitive tools for resource management and resource utilization.
- Track and manage resource, utilization targets across all levels, from a single resource to groups of resources.
- Improve resource management with consistent decision-making and better resource utilization.

Features:

- Designed for part-time project managers, this solution provides intuitive project collaboration, planning and scheduling capabilities, enabling users of all skill levels to easily manage and control projects.
- Merge social project collaboration and project planning for real-time interaction through conversations and documents.
- Improve project collaboration when you're away from the office. Communicate scope and project status using smartphones and tablets.

Features:

- Manage tasks, project assignments and related interactions through a social network. Free up team members to spend less time tracking administrative and project work and more time on project tasks.
- Merge social collaboration and task management with project assignments and to-do lists.
- Give team members self-service capabilities to manage and execute their work, reducing the burden on project managers.

Project Core Components

- Project Contract Billing
- Project Financials
- **PROJECT FINANCIAL MANAGEMENT**
- Grants Management
- **PROJECT MANAGEMENT**

Integrated BI Analytics, Social & Extensibility

EPC TECHNOLOGIES

Primavera Enterprise

Project Portfolio Management Products

Oracle's Primavera is the leading global provider of cloud and on-premise Enterprise Project Portfolio Management (EPPM) solutions. EPPM leaders and executive stakeholders across all industries rely on Oracle's Primavera solutions to improve strategy execution, operations and financial performance.

- Primavera P6 Enterprise Project Portfolio Management
- Primavera Unifier
- Instantis EnterpriseTrack
- Primavera Analytics
- Primavera Gateway and Integration Products
- Primavera Prime
- Primavera P6 Professional Project Management
- Primavera Portfolio Management
- Primavera Risk Analysis
- Contract Management, Business Intelligence Publisher Edition

Primavera Unifier

Rapid project execution with increased visibility

Primavera Unifier provides a best-in-class cloud-based solution for managing capital projects and facilities of any size in every vertical market. It combines rich cost management and control, document management, schedule and resource management, fund management, and more.

Instantis EnterpriseTrack

Optimize Project and Resource Investments

Instantis EnterpriseTrack is a leading cloud PPM solution used by IT and business process leaders to improve strategy execution and financial performance through more effective work and resource management.

Primavera Analytics

Handle large-scale projects with ease

Primavera Analytics is a packaged BI solution that provides valuable insights into your Primavera P6 EPPM and Primavera Unifier project portfolio performance so you can uncover trends, discover the root cause of issues, and ensure your stakeholders have clear visibility into schedules and costs.

EPC TECHNOLOGIES

Primavera Enterprise

Primavera Gateway and Integration Products

Pre-Built Integration for Project Portfolio Management

Oracle offers several options to seamlessly integrate Primavera project portfolio management solutions with other Oracle and third-party applications, such as Oracle's AutoVue, Oracle's PeopleSoft Projects (ESA) and SAP.

Primavera Prime

Integrated Cloud based Portfolio and Project Management

Primavera Prime provides cloud based project and portfolio management solution that allows customers to manage prioritization, planning and execution of project.

Primavera P6 Professional Project Management

The recognized standard for high-performance project management

Primavera P6 Professional Project Management, the recognized standard for high-performance project management software, is designed to handle large-scale, highly sophisticated and multifaceted projects. It provides unlimited resources and an unlimited number of target plans.

Primavera Portfolio Management

Unmatched flexibility for enterprise portfolio management

Primavera Portfolio Management is the leading portfolio management solution, providing unmatched flexibility and infrastructure for enterprise portfolio management.

Primavera Risk Analysis

Full lifecycle risk analytics solution

Primavera Risk Analysis is a full lifecycle risk analytics solution, integrating cost and schedule risk management. Primavera Risk Analysis provides a comprehensive means of determining confidence levels for project success.
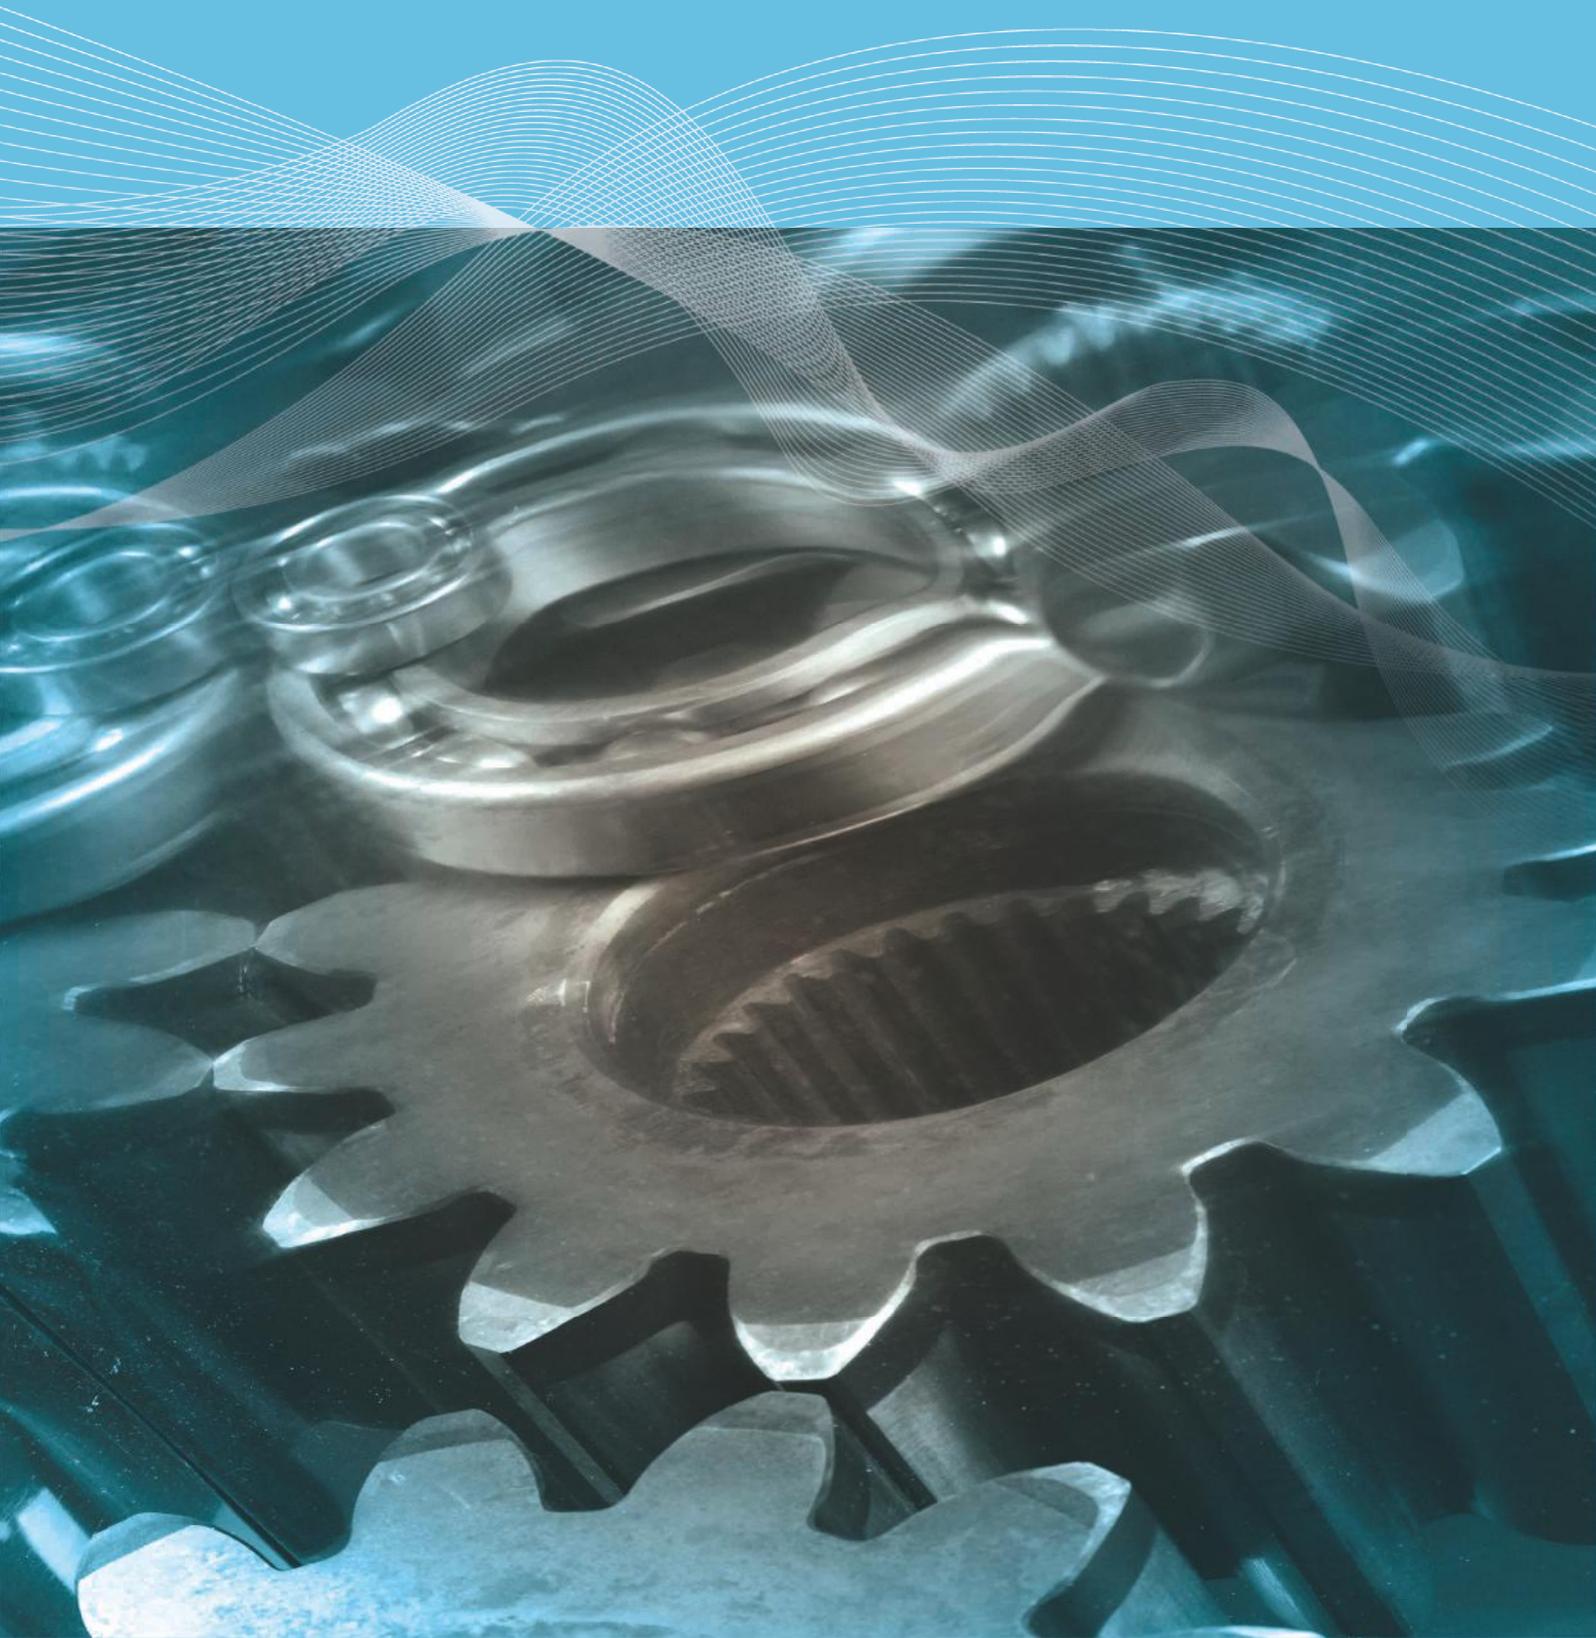

Contract Management, Business Intelligence Publisher Edition

Keep construction projects on schedule and on budget

Primavera Contract Management, Business Intelligence Publisher Edition is a document management, job cost, and field controls solution that keeps construction projects on schedule and on budget.

EPC TECHNOLOGIES

"It is not a question of how well each process works; the question is how well they all work together."

~ Lloyd Dobyns and Clare Crawford-Mason

Project Health Checks

EPC Technologies Oracle Project health check identifies whether you are getting the most out of your investment in Oracle Projects applications. Our team will provide you with a clear, detailed analysis of the areas where your organisation can improve the performance of your Oracle Projects system; that support your business processes.

If you answered "No" to any of the following questions, you need to call EPC Technologies, **at no additional cost**, to conduct an Oracle Project Health check for your application:

- *Are your business processes aligned with the software?*

- *Are you using full functionality available to you?*

- *Are you fully utilising all available and licensed application modules?*

- *Are you using all application functionality that could improve business processes?*

- *Would an upgrade or cloud migration give you additional benefits and/or functionality?*

Benefits

- An independent report delivered by industry and technical experts

- Best practice recommendations

- A strategy to maximize the ROI on your Oracle Projects Application investment

- Identification of substandard aspects of your system

- Identification of areas / functionality of Oracle Projects that you do not understand

- Advice on extending the use of functionality and applications

- Identification of minor enhancements to set-up and processes for ways to use your current systems more effectively to improve business performance

- Assessing the impact of upgrading or expanding your oracle projects footprint

- Advice on improvements to enhance projects control and reporting

- Identification of training needs

EPC TECHNOLOGIES

Project Health Checks

Calling on Project Leading Specialist to create a bespoke diagnosis

EPC Technologies consulting team will do a full analysis for a complete understanding of your Oracle Projects challenges. They will design a bespoke health check to focus on your areas of concern, including: *Project Analytics, Project Billing, Project Contracts, Project Collaboration, Project Costing, Project Management, Project Resource Management, Project Portfolio Analysis.*

Our team will also review the integration between your Oracle Project applications, and other Oracle modules / 3rd party systems, guided by your needs.

Our review can be as broad and intense as you specify, extending to:

- New R12 applications and functionality, including sub ledger accounting
- Integrated third party applications and customisations
- Additional Oracle Projects modules and associated business processes

- Integration to other E-Business suite modules, including modules from Financial Management, Supply Chain Management, HR and BI Applications.
- Cloud Migration readiness and roadmap

Collaborative-partnership health check approach

A project health check allows you to remain in control of the scope of the process and outcomes. You will be working alongside with EPC Technologies Project Team.
The EPC Technologies Project Health Check consist of three phases:

BASE ESTABLISHMENT	DELIVERY / ANALYSIS	REPORT
Project consultants work with your key stakeholders to understand and plan the scope of work and deliverables, identifying problems needing a special focus.	We deploy consulting experience and diagnostic tools to analyse your organisation's Oracle Projects implementation. Our analytic approach is based on the Base Establishment phase, especially the focus / problem areas. Following information gathering, our consultants apply their expertise and experience to analyse and collate all findings.	Our comprehensive health check report typically includes a priority action plan, strategies, advice, upgrade indicative costs, timescales, roadmaps and recommended system configuration changes. You will then be fully briefed should you decide to call upon us to respond to the outcomes of the health check.

Timescale

The precise timescale a Project Projects health check will vary depending on your specific requirements. The parameters of a health check are agreed in advance.

EPC TECHNOLOGIES

Services

Project Management

- With our project methodologies, implementation experience and work methods, it assists our consultants to organise and simplify complex projects and reduce cost overrun, quality issues or delays.

ERP Consulting

- Our Oracle certified consultants are in an ideal position to provide best in class solutions to your business needs. Our team's expertise in E-Business, Oracle Cloud and Primavera let us understand the impact of these systems have on your organisation processes.

Managed & Support Services

- Tailored Support Packages at your fingertips.
- EPCT offers a cost-effective alternative which typically saves our clients up to 50% compared to the cost of hiring or retaining a full-time Oracle Business systems support resource.

Development

- EPCT has a strong team of developers having expertise in developing Standalone Applications as well as Custom Extentions on top of EBS Modules.
- The Application Development Practise specialises in :
- Custom API
- Oracle Mode Customization
- Report Development
- Custom Forms Development
- Custom Form & Web Services
- Extending Functionality

EPC TECHNOLOGIES

Services

Business Requirement Analysis

- With our team's extensive experience in ERP processes we can quickly and efficiently help you in transitioning to a new set of processes during an upgrade and the introduction of a new module or functionality. We have defined set of blueprint (by release) for each back office business process (PPM, FIN, HCM, Proc) speeding up the fit gap analysis between your processes and the target processes.

Hosting Services

- We provide a complete managed IaaS (Infrastructure as a Service) hosting solution.
- Oracle Cloud's IaaS allows businesses run all workload in the Cloud. It has a complete joined environment that has been enhanced for the Cloud and gives a united security version. By providing reliable cost-effective hosting services our aim is to make your Oracle experience productive, with a positive impact on your bottom line.

Migration & Upgrades

- We deliver end-to-end Oracle solutions and Oracle services around technology consulting, implementations and rollouts and have specialization in helping clients upgrade, migration, rollouts, extend and maintain applications like Oracle's E-Business Suite, PeopleSoft, Primavera.

Value Added Services

Health Check

- EPCT Oracle Configuration and Performance Review (Oracle-CRP) was developed specifically to assess the performance, stability and availability of your Oracle systems.
- This Oracle health check can be focused on performance, security, migration, upgrades or availability concerns.

Custom Training Guides

- Easy to use tool for new hires
- Customer-specific training guide
- Based specific on each Oracle module implemented
- Good reference for employees when 'stuck' with Oracle system process – "What should I do"
