

Chains are Evolving.

Introducing Tycan® chains exclusively from Crosby.

Tycan®, strong as steel and 8x lighter.

Tycan® chains give you the performance and flexibility of a steel chain at a fraction of the weight. Due to the low weight and soft touch, Tycan® is easier and more ergonomic to work with.

Certified for lashing cargo.

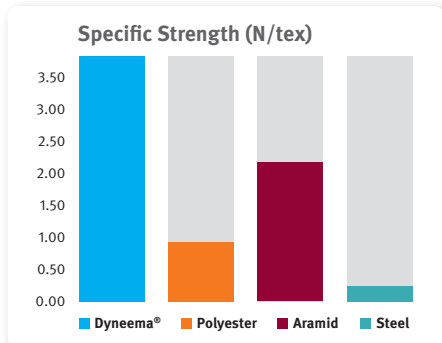

For outsize cargo, Tycan® chain offers a wide array of benefits for a variety of industries, such as construction, heavy transport, marine & offshore.

- 
LIGHTER
- 
STRONGER
- 
MORE DURABLE
- 
LESS DAMAGE
- 
IMPROVED PRODUCTIVITY
-

GREENER

Making the world's strongest chains with Dyneema®.

TYCAN® CHAINS ARE 100% DYNEEMA®, THE WORLD'S STRONGEST FIBER™.

The webbing is layered and twisted to create links that are as strong as hardened steel. An entire chain is light enough for one person to carry and work with.

THE INNOVATIVE FORMULA:

THE YARN — THE LAYERS ≡ THE TWIST ∞ THE LINK ∞∞

Lightest.

Eight times lighter than regular steel chain yet just as strong. Light enough for one person to work with all day long.

Strongest.

Tycan® is 100% Dyneema®, the world's strongest fiber™. Features eight layers of webbing in a Mobius twist for maximum strength.

Toughest.

Extremely resistant to cuts and abrasions. Oil, dirt, diesel, grease, UV, etc. all have no impact on the capacity or functionality.

Safest.

Light weight, strength, softness, and quietness of Tycan® all contribute to reduced accidents and damage for both crew & cargo.

FOR 100 YEARS PLUS, CROSBY HAS BEEN THE MARKET LEADER FOR INNOVATION, SELECTION, QUALITY, AND VALUE.
