

TITLE:

Kansas OB/GYNs Unveil Innovative Juliet™ Rejuvenation, Boost Women's Quality of Life

SUMMARY:

Doctors at [Mid Kansas Women's Center](#), Wichita's oldest independent OB/GYN practice, expanded women's health care services in the state by introducing the breakthrough Juliet™ laser vaginal rejuvenation treatment. The center now provides a variety of services for women experiencing laxity, dryness, leakage, and other conditions.

ARTICLE TEXT:

WICHITA, Kan. — The eight doctors at Wichita's oldest independent OB/GYN practice are "enthusiastic and excited" about advancing women's health care by introducing Kansas's first Juliet™ laser treatment, the world's most innovative vaginal rejuvenation technology.

Recognizing an opportunity to expand women's access to cutting-edge treatments, [Mid Kansas Women's Center's](#) team of experienced Obstetrician/Gynecologists acquired the [new Juliet™ feminine rejuvenation laser](#) to provide gentle outpatient procedures for the advanced treatment and reversal of many symptoms of feminine aging. The center now provides a variety of traditional and progressive gynecology services, including vaginal rejuvenation treatments for laxity, dryness, leakage, and many other conditions.

"We are enthusiastic and excited about the benefits the Juliet provides women and the positivity it brings in terms of allowing women to feel good about themselves," said Dr. Rhea A. Rogers. "The Juliet is extremely beneficial to women who cannot or will not take hormone therapy, and it restores a more youthful feeling to women—enhancing opportunities for intimate bonding among maturing couples."

The Juliet™ vaginal rejuvenation laser from Zarin Medical incorporates the superior Erbium:YAG laser technology that provides better results to many intimate feminine problems (including painful intercourse) than common CO₂ and RF lasers. The Juliet™ treatment is a fast, painless, and non-surgical in-office procedure that can yield noticeable results in one to three treatments with a low risk of side effects and minimal downtime. Mid Kansas Women's Center provides gentle solutions for women hoping to regain elasticity and lubrication, reduce some types of urinary leakage, and reduce or eliminate feminine itching and irritation.

"I have always felt compassion to have a positive influence in people's lives by helping them understand how our bodies age and feel good about themselves," said Dr. Rogers. "The Juliet treatment impressed me by providing quick results and a meaningful and encouraging impact that aligns with our mission. I have noticed great improvement to our patients' overall quality of life as a result of the rapid physical changes in the vagina from Juliet treatments."

Mid Kansas Women's Center's efforts to increase women's access to leading feminine rejuvenation treatments will soon be expanded. A special financial assistance

program for women who meet certain income criteria to receive the Juliet™ treatment at a reduced cost (up to 50%) is under development.

Women in the Wichita area currently suffering from intimate problems can now regain lubrication and elasticity, as well as reduce and eliminate painful intercourse, irritation, itching, and leakage. The new Juliet™ vaginal rejuvenation laser treatment is only available in Kansas at Mid Kansas Women's Center.
