FOR IMMEDIATE RELEASE:

Groschopp, Inc. Announces AC Motor-Control Combo with Chassis Enclosures

Sioux Center, IA, October 7 2016 – Groschopp, Inc. is currently setting apart its AC motor-control combo by implementing strategic compatibility design measures. When matched with Groschopp motors and gearmotors, the DA1225K-0 and DA1215K-0 reduce slip and increase efficiency better than other drives on the market. In addition, these AC controls exhibit the following characteristics:

- Short circuit protection
- Input voltage options: 115/208/230 at 50/60 Hz
- Industry standard mounting
- Slip compensation with static auto-tune and boost
- MOV input transient suppression
- Electronic inrush current limit

Model #: DA1225k-0

Model #: DA1215k-0

“We wanted to provide a lower cost solution with powerful starting torque on 3 phase power.”

-Ed Tullar, Groschopp Sales Manager

For over 80 years, Groschopp Inc. has delivered expert technical assistance, superior product performance, quality-honed workmanship and industry experience in the manufacture of highly engineered fractional horsepower electric motors and gear motors for OEM and distribution products. With products designed and manufactured in the USA, Groschopp offers a full line of AC, DC, brushless DC and universal motors—as well as AC controls—that can be combined with right angle worm, planetary, right angle planetary or parallel shaft gearboxes. (An ISO 9001:2008 registered company.)
