

Where integrity runs deep.

Best-in-Class Data Center Solutions

Cavern Technologies was founded by risk management experts dedicated to protecting client assets and delivering peace of mind.

We've earned a reputation for staying steps ahead and providing IT infrastructure solutions that allow our clients to focus on growing their business, while minimizing cost of ownership and enhancing security. We are the premier data center provider for startups to Fortune 1000 firms who seek a better solution. Cavern is the **ONLY** true underground hosting facility in the region that offers fully redundant, disaster-proof data center space.

Customized for Performance

From large-scale, custom, private enterprise data suites to co-location and rack space, Cavern Technologies offers a wide range of data center options for clients of all sizes and across all industries. With over 300,000 square feet of secure data center property, we have space that is move-in ready or can build to suit your specific needs. Cavern Technologies offers scalable space solutions to support you as you grow.

Colocation

- Private Data Suites
- Rack space

Wholesale

- Turnkey
- Build to Suit

The Solid Choice

From 125-feet beneath the Earth's surface in the heart of the country, Cavern's unique underground location offers a host of security benefits, environmental advantages, and business conveniences.

Security

Security is priority one for the Cavern Technologies team. Being sheltered beneath the surface in a controlled environment ensures incomparable protection of your assets.

- Multiple layers of physical and cutting-edge technological defenses
- Controlled access using advanced biometrics
- Natural and purpose-built safeguards against weather-related and man-made hazards

Power

Reliability and redundancy are the core of our service. Cavern Technologies has built a strategic partnership with KCP&L, a premier provider in the Midwest to provide robust power. Our data suite clients have access to:

- N+1 redundancy on generators, up to 2N redundancy on UPSs, PDUs, and RPPs
- Up to 36 hours of on-site fuel storage for protected generators
- Redundant primary power feeds to the subsurface with up to 50MW potential capacity from 2 separate feeds

“The value and reliability of the service are great. Using Cavern's lower-cost structure is critical to our overall budget and service delivery.”

- CIO & Founder, High-tech Development Firm

Connectivity

Cavern clients can leverage our strategic partnerships with multiple carriers to choose the provider that best aligns with their needs. Time Warner Business Class, Cox, AT&T, Century Link, Level 3, Unite, and Consolidated provide underground fiber that enter from completely separate routes. Total redundancy of SONET-based services, including fiber path loop protection and Telco Central Office diversity are available.

- Carrier Neutral
- Blended Bandwidth
- Private Transport
- Basic & Dedicated Voice Services
- Multicarrier, Redundant Internet Access
- Ethernet and/or Dedicated Circuit Handoff

Efficiency

We align sustainability with profitability by leveraging our unique, custom-built HVAC and cooling systems to improve the bottom line for our clients.

- 20-30% reduction in cooling costs is typical for most Cavern clients
- Our facility is Energy Star Certified by the EPA at 96%
- Consistent, ambient temperature of 68°

Compliance

We meet and exceed high infrastructure and security standards and maintain SSAE 16 Type II and SAS 70 certifications. This streamlines the process for enterprise clients who are required to comply with industry regulations, such as HIPPA and PCI DDS, and provides additional peace of mind.

Amenities

Convenience and comfort are key factors in creating productive workspaces. We were mindful of this in creating support centers for our clients.

- 42" loading docks
- Secure onboarding storage
- Access to conference and meeting rooms
- Full kitchen facility
- Restrooms with showers

Above & Beyond from 125-Feet Below

In 2007, Pete and John Clune founded Cavern Technologies. As executives working with industries where IT infrastructure services were critical necessities, they recognized a need to deliver solutions that were not just better, but raised the bar for excellence. By building a team of dedicated pros and staying true to their core values and high standards, Pete and John grew Cavern to be the best-in-class partner for enterprise clients across varied markets, including healthcare, financial, legal, and tech sectors.

INDUSTRY
EXPERIENCE

“We moved our data center to Cavern Technologies last summer. We are extremely pleased with the level of service and communications that everyone, from the systems engineers to the CEO, provides. If you’re looking for a new data center, you can’t go wrong by choosing Cavern Technologies.”

- Principal, Managed Services Company

Central to Cavern’s success is the dedication of Cavern’s team to deliver the right solution for each individual client - and staying ahead of the curve to ensure the best possible service. Cavern is more than a data center space, we are serious about client care. In our book, trust and respect are mission-critical too.

THE CAVERN PROMISE

COMMITTED

We are dedicated to delivering solutions tailored for your unique IT needs.

ASSURED

We provide a secure, mission-critical environment with top-tier operational controls.

READY

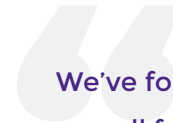

We proactively address all possible scenarios to minimize your risk.
