

The DoubleUp Vertical Bike Rack

COMMUTER SOLUTIONS FOR THE MODERN WORLD

A SUSTAINABLE SITES PROJECT

Traditional Models
Of Transportation
Infrastructure Are Outdated

To Meet The Needs
Of A Growing Population
Of Commuters

A Plan That Focuses On
Different Forms Of
Transportation Is The Answer

A BETTER EXPERIENCE FOR CYCLIST
COMMUTERS MEANS HAPPIER
PROPERTY OWNERS AND PLANNERS

MAKE THE EXPERIENCE BETTER FOR
EVERYONE, AND YOU WILL
HAVE A BETTER COMMUNITY!

A GREAT RACK REWARDS RIDERS!

“We believe it is imperative we reward and encourage ridership through an infrastructure that screams RIDE, and we believe we have built just that”

Chris Luyet
VP OF SALES AND MARKETING

WHY CHOOSE THE DOUBLEUP?

- › High security locking arm
- › Durable Powder Coat finish
- › Bicycle friendly with no metal to metal contact
- › Designed for maximum density parking
- › Vertically staggered wheel hooks for ease of loading
- › Modular design for any situation
- › Well-defined footprint
- › Intuitive design
- › Designed for universal parking
- › 3 Points of Locking contact

DoubleUp

VERTICAL BIKE RACK

Wheel Hooks

Vertically staggered wheel hooks not only index parked bikes, but also eliminate handlebar conflict and create more space to load bikes.

The Right Finish

Sustainable Site's Powder Coat finish ensures an even and seamless coating which prevents metal to metal contact.

Intuitive Locking

The DoubleUp's locking arm offers three points of locking contact, but also makes it easier for riders to see how they should lock their bicycles efficiently.

Spatial Footprint

The DoubleUp's locking arm in addition to the offset wheel hooks ensures a well defined spatial footprint for bicycles and a better organized location!

WHAT YOU WON'T GET WITH THE DOUBLEUP...

OVERCROWDING

Space is insufficient between parking spots

The design of the DoubleUp ensures that there is not just ample room, but also comfortable bicycle parking for commuters. This ensures that available spots are used and not abandoned because there is overcrowding.

TOO MUCH SPACE

Racks take up too much space

Some racks use up real estate and are not spaced efficiently. The DoubleUp was designed to optimize both comfort for the commuter and space for the planner.

DIFFICULT FOR USER

Requires heavy lifting

Other racks on the market solve the space issue by stacking bikes on top of each other. This can be a challenge for riders with less upper body strength, as lifting a bike 4 feet off the ground is not as easy as it looks.

AVOID A BIKE STORAGE ROOM THAT IS CHAOTIC AND DISORDERLY

Some of the most popular bicycle racks can be damaging and lead to disorganized and unfriendly bicycle storage rooms. Many users are confused about how to best lock their bicycles, or the bicycle footprint overlaps parking spaces and unfortunately chaos ensues. This makes an eyesore for landscape planners and a confusing parking area for cyclists.

The DoubleUp was designed to eliminate these concerns and ensure that cyclists frequent your location more, which leads to less traffic on the streets and as some studies have shown, greater revenue for your business!

CREATE A BICYCLE FRIENDLY STORAGE ROOM

Add a rules and education sign to add to the experience

Add a Bike Repair Station and Pump to assist riders on location

Offer ground mounted horizontal parking if space is available

Offer a space-efficient and bicycle friendly design

SPACE SAVING DESIGN THAT REALLY ADDS UP

In a side by side comparison with our competitors, the DoubleUp illustrates a clear advantage in planning for bicycle parking and site furnishings. What this means is a location that allows for more freedom for planners and more space for cyclists and pedestrians to navigate. But don't just take our word for it, take a look at our side by side scale drawing analysis with another popular bicycle rack on the market and decide for yourself!

The Double Up

17 in | AISLE SPACING

32 bikes loaded (drawing to scale)

Approx. 11 Feet saved

which can be valuable space for additional products like fix stands, educational signs or bike pumps for a bike room.

Dero Single SpaceSaver

SUSTAINABLE SITES

SUPERIOR DESIGN

The Sustainable Site's products are designed for the greatest user experience, which includes durability as well as an aesthetically pleasing appearance which ensures customer satisfaction!

UNIFIED FURNISHINGS

A consistent look for your site furnishings makes your landscape look better. Our designs were created with this in mind, to ensure a cohesive and consistent look to your site furnishing plan!

MADE IN THE U.S.A.

We build high quality products right here in the USA. We've supplied site furnishings to schools, municipalities, universities, shopping centers, malls and parks all across the country.

OUR CLIENTS

We have had the opportunity to work with a diverse group of clients in the past such as Lockheed Martin, Google, Yale University, MGM Mirage and The Pittsburgh Pirates

QUICK TURNAROUND

At Sustainable Sites we will take your project from the design and concept stage to having the site furnishings at your site faster than many competitors

EXPERIENCE

The Sustainable Sites team has more than 80 years combined experience in the site furnishings business, and this guarantees we will find the right solution for you!
