

Smart Scheduler

Job Scheduling with Oracle's JD Edwards EnterpriseOne Just Got Smarter!

Why SmartScheduler?

- ✓ Consistent look and feel with JDE allows easy implementation, training and daily operation
- ✓ No additional hardware required
- ✓ Advanced features that customers love with more in the roadmap
- ✓ Cost to Value
- ✓ Lower overtime and employee lost time

Challenges customers are facing before SmartScheduler ...

- ✓ Required to use Single Stream to control job execution
- ✓ Buildup of jobs in queue from scheduler slow/shutdown
- ✓ Poor usage of server resources
- ✓ Difficult to monitor, especially during off hours
- ✓ Alternatives with non-JDE schedulers available are very expensive

Features

- Stream Management
- Advanced Dependency Management
- Email PDF/CSV
- Smart Scheduler Lite for Power Users
- Jobs Available to Schedule
- UBE Logging/Tracing
- Job Notification on complete/fail
- Job Notifications when running long
- Transfer Output
- Job queue/Server to run jobs
- Smart Restart – only submit appropriate jobs after restart
- User management for submitted jobs
- Smart Notifications
- Detailed Recurrence Setup

Analytical Reports

- Detail & Summary Stream Report
- Scheduled Streams for a Specific Date
- Audit Reports
- Min/Max & Average Time Report

- Create Streams
- iPhone/Android compatible

Time Zone Support

Schedule in user's time zone

Event based Scheduling

3rd party support

- SQL
- Oracle
- File Adapter
- BI Publisher

What Customers are saying

“We don’t need to bother our CNC teams when it comes to scheduling jobs. With SS Lite, we do it ourselves. CNC team has bigger fires to fight...”

“No training required, same look and feel as our current E1 Scheduler with more Power”

“This solves all of my problems and a few that I didn’t even know that I had!”

“Our Nightly jobs finish couple of hours earlier than before due to Multi-Dependency Management”
