**Toshiba T1000 Series Single-Phase Uninterruptible Power System Now Available in 1 & 2 kVA**

**HOUSTON, TX — Oct. 27, 2016** — Toshiba International Corporation (TIC) has expanded the T1000 Series single-phase uninterruptible power system (UPS) line to include 1000 VA and 2000 VA models, ideal for retail and IT applications. Users have the choice of rack-mount or traditional tower form factor, both featuring true online double-conversion capabilities in addition to power factor correction and voltage regulation.

“The T1000 Series uninterruptible power system is our premier single-phase product offering for server applications,” said Greg Mack, Vice President and General Manager of the Toshiba’s Power Electronics Division. “With the new T1000 models now available, customers have a very cost effective solution without having to sacrifice the proven topology of double conversion UPS.”

As a double-conversion online UPS, the T1000 supplies uninterrupted, clean single-phase power to critical systems over large input voltage deviations without resorting to battery backup. The T1000 Series UPS is available in a tower module and a small 2U rack-mounted version. The latest model T1000 now extends the series size capacity from 1 to 6 kVA. When paired with Toshiba’s RemotEye® 4, end-users can monitor and manage UPS installations remotely via features such as email alerts, history/event logs, and remote client shutdown.

**Standard Features:**

- True Online Double Conversion
- Tower or Rackmount Form Factor
- 0.9 Output Power Factor
- Auto-Restart & Cold Start
- Extended runtime available with optional external battery cabinets
- Compatible with RemotEye® 4 for monitoring and security

**About Toshiba**

Toshiba Corporation, a Fortune Global 500 company, channels world-class capabilities in advanced electronic and electrical product and systems into four strategic business domains: Energy Systems & Solutions, Infrastructure Systems & Solutions, Storage & Electronic Devices Solutions Company, and Industrial ICT Solutions Company. Guided by the principles of The Basic Commitment of the Toshiba Group, “Committed to People, Committed to the Future,” Toshiba promotes global operations towards securing “Growth Through Creativity and Innovation,” and is contributing to the achievement of a world in which people everywhere live in a safe, secure and comfortable society.

Founded in Tokyo in 1875, today’s Toshiba is at the heart of a global network of over 590 consolidated companies employing over 200,000 people worldwide, with annual sales surpassing 6.5 trillion yen (US\$63 billion).

#### **About Toshiba International Corporation**

TIC is a Toshiba America Inc. (TAI) Group Company, a wholly owned subsidiary of Toshiba Corporation. TIC is headquartered in Houston, Texas and employs approximately 1,400 people. TIC provides application solutions to a wide range of industries including industrial, power systems, and transmission and distribution systems. For more information about TIC, please visit [www.toshiba.com/tic](http://www.toshiba.com/tic).

#### **About the TIC Power Electronics Division**

The TIC Power Electronics division has more than 25 years of experience in uninterruptible power systems. Toshiba produces a versatile range of single-phase and three-phase UPS solutions and accessories hallmarked for outstanding performance and reliability. Single-phase models range from 1 to 22 kVA, while three-phase single module systems range from 13.5 to 2,000 kW and three-phase parallel module systems from 90 to 16,000 kW. These systems are suitable for a wide range of applications including data centers, telecommunication, retail, healthcare, broadcasting, and industrial.
