

CYBER ATTACKS ARE GROWING MORE SOPHISTICATED.

Breaches are more common than ever before, and it's hard to keep pace with all the HIPAA-HITECH regulations — which means you may be at risk for devastating consequences.

You need to protect your data, your patients and your reputation while ensuring compliance, but you don't have the resources to do it alone. You need a team that knows healthcare and cybersecurity to come alongside you.

Who We Are

Fortified is a team of healthcare cybersecurity experts. We don't just dabble in healthcare, it's our sole focus. That means we understand the value of your data, the regulatory pressures you face, and the need to make it all work within a budget.

Working with Fortified means you have a dedicated force keeping you ahead of the threats AND the regulations. You can rest in confidence knowing you are protected by industry-leading processes and technology, and completely prepared to meet the breadth of compliance requirements day in and day out.

Who We Serve

We partner with healthcare organizations across the continuum, serving both covered entities and business associates. Current clients include health systems, single hospital entities, physician practices, post-acute providers, payors and business associates.

What We Do

Our depth and breadth of services and our experienced staff effectively identify and assist in the management of cybersecurity risks by partnering with our clients to continuously increase their security posture.

We help strengthen healthcare organizations' overall security program by assessing risks, implementing safeguards to protect sensitive information and assisting with their compliance with state and federal regulations.
