

## **LARIMER COUNTY, COLORADO GOES LIVE WITH INDUSTRY LEADING LAND RECORDS SYSTEM, LANDMARK, FROM PIONEER TECHNOLOGY GROUP**

*Larimer County Clerk & Recorder has a new Land Records management system that will enhance the County's ability to serve its citizens.*

Larimer County now offers its citizens access to the industry's most powerful Land Records system. Pioneer Technology Group successfully converted all of the historical data and images from the legacy system into Landmark and installed the software within the Records Division. Larimer County had quite a few options to choose from in moving to a new system and chose Landmark based on Pioneer's ability to provide a streamlined, state-of-the-art system and unparalleled customer service.

Angela Myers, Larimer County Clerk & Recorder, had this to say: "Larimer County is excited to join the Pioneer family as we upgrade to the Landmark system for our Recording platform in the Clerk and Recorder's office. Our citizens benefit in a big way, as we move forward and improve their experience with e-commerce and 'Easy Access.'"

The move to Landmark has provided Citizens and staff efficiency gains including online access to marriage license kiosks designed to reduce the processing time which decreases the wait time for the public. Using Landmark, the Recording office now has the ability to scan all recordable documents immediately upon receipt and use electronic queues to move documents through the recording process. The new system provides the public users of the land records information immediate access to the indexes and images online with a subscription. Recorded documents are available on the public access site, real time, as soon as they are recorded within Landmark.

"The expansion across Colorado is an exciting one and we are building a strong partnership with Larimer County with Landmark," said Ryan Crowley, Vice President of Sales & Marketing for Pioneer. "The success of Landmark's installation in Larimer County is a big step in our continued expansion across the Country."

Larimer County joins the growing list of customers to install Landmark with Pioneer Technology Group. In addition to Landmark, Benchmark, Pioneer's Foreclosure Case Management system is also being utilized in the City & County of Denver, Colorado. Pioneer offers a full suite of products in addition to Landmark and Benchmark designed to aid the government in board of equalization management, tourist and bed tax collection, property tax deed sales, jury management, and content management services.

### **About Pioneer Technology Group**

Pioneer Technology Group (Pioneer) is a leading developer of software solutions and services to Governments and the private sector. The company is headquartered in Sanford, Florida and recently opened a location in Wooster, Ohio. Offerings include: Benchmark, a court case management system, the Landmark official records system, the YourDox title document system, and tax processing systems for counties and municipalities. Pioneer also provides content management systems and a scanning services bureau for transitioning paper to digital images through its subsidiary, Pioneer Records Management.
