

# World's first realtime Nutritional Biosensor

Your Health,  
Hands-On.

## Live a smarter and healthier lifestyle with One X biosensor.

**One X is a revolutionary patented handheld sensing device that measures your skin antioxidant level.**

**The scan is done directly from the palm of your hand, instantly and non-invasively.**

Your nutritional and lifestyle habits can negatively or positively affect your antioxidant status.

One X allows you to track your level over time in response to habits such as **diet, supplements, sleep, exercise, sun, alcohol, stress and pollution** and get instant insight on their impact on your body.

One X App provides you with personalized recommendations such as custom nutritional guidance and specific supplement formulas to reach your peak antioxidant protection.

**One X empowers you to reach the perfect lifestyle balance:**

So you can reach your peak antioxidant level for improved daily wellness and long-term health.

**R&D and Manufacturing  
in Germany**

Quality and excellence

**Personal and Sharable**

Insight on Your Diet/Lifestyle**

**Personal AI to Improve  
Your Diet and Lifestyle**

**Personalized Supplement  
Formula**

Advanced nutrient  
absorption technology

## About One X

One X was founded by Anthony Weil - MBA, Reinold Rossler. Alexander Rieder – MSc and Jean Butterlin in 2015 after more than 2 years of hardware and software R&D across Germany, USA and Brazil.

One X has assembled a team of world-class transdisciplinary experts in applied biophysics, biology, software engineering, computer vision, and design with support of the leading innovation think tank Singularity University and key influencers in the field of health (partnerships under review).

One X is headquartered in Mountain View, California.

One X Sensor is available now for pre-order on Indiegogo for the very early bird price of \$99 in limited quantity.
