Rigaku is presenting its XRD and XRF technology for qualitative and quantitative analysis at the 2016 Eastern Analytical Symposium (EAS)

November 14, 2016 – Somerset, NJ. [Rigaku Corporation](#) is presenting its diverse range of X-ray analytical instrumentation at the 2016 Eastern Analytical Symposium and Exhibition ([EAS](#)).

The event is taking place November 14-16, 2016 at the Garden State Exhibit Center in Somerset, NJ. Rigaku is presenting its latest benchtop X-ray diffraction (XRD), X-ray fluorescence (XRF) and Raman spectroscopy instrumentation at booth 438.

EAS is held each year to provide professional scientists and students continuing education in analytical sciences and showcase the latest instrumentation and services for the community of analytical scientists.

The three-day event highlights the latest innovations in analytical chemistry and features a number of courses and professional development workshops along with a technical program and exhibition.

Rigaku manufactures a complete line of X-ray analytical instrumentation and components for research, testing, industrial process control, and product development.

Featured at the exhibition is the [Rigaku MiniFlex](#) benchtop X-ray diffractometer. The fifth generation MiniFlex™ is a general purpose X-ray diffractometer designed to deliver speed and sensitivity through innovative technology enhancements such as the optional D/teX high-speed detector coupled with a 600 W X-ray source, and can perform qualitative and quantitative analysis of polycrystalline materials. The 600 W MiniFlex is the most powerful system of its type and features an available sample changer.

About Rigaku

Since its inception in Japan in 1951, Rigaku has been at the forefront of analytical and industrial instrumentation technology. Rigaku and its subsidiaries form a global group focused on general-purpose analytical instrumentation and the life sciences. With hundreds of major innovations to their credit, Rigaku companies are world leaders in X-ray spectrometry, diffraction, and optics, as well as small molecule and protein crystallography and semiconductor metrology. Today, Rigaku employs over 1,400 people in the manufacturing and support of its analytical equipment, which is used in more than 90 countries around the world supporting research, development, and quality assurance activities. Throughout the world, Rigaku continuously promotes partnerships, dialog, and innovation within the global scientific and industrial communities.
