Our vision

Our vision is to become one of the biggest assets to the automotive industry. We want to better the automotive service industry into a more transparent and easier one. CAKNOW will be an online marketplace where vehicle owners and service providers can conduct service request, quotes, and transactions.

CAKNOW envisions a community where service providers and organizations can find industry trends and information, customers, equipment and parts, and Service records.

Our members will enjoy our easy to use software, free marketing opportunities, discounts to industry services, and much more. Ultimately CAKNOW will become the one stop solution for auto service providers.

What is CAKNOW?

CAKNOW is a mobile app that allows customers to choose automotive services on a real-time quoting basis. It's an app that takes the automotive service industry to the 21st century. CAKNOW is revolutionizing the auto industry by solving issues of miscommunication, delays in quoting and payments.

With mobile applications rapidly changing the way of everyday tasks such as taxi service and take-out service, the founder of CAKNOW thinks it's time for the automotive service industry to be as accessible as a touch of a button. Without the driving around, lack of knowledge of car conditions, and miscommunication, CAKNOW customers will enjoy car services the way they deserve.

Automotive service shops will have access to all of CAKNOW's local users, a detailed description of the car condition, its history, an image of the car, the liberty to choose jobs, and fast and secure payment.
