FOR IMMEDIATE RELEASE:

Groschopp, Inc. Announces BL Motor-Control Combo for Tougher Applications

Sioux Center, IA, October 6, 2016—Groschopp, Inc. currently offers two brushless motor-control combos with high efficiency operations and low power losses. The 750-30-0002 with a chassis enclosure and the 750-30-0003 with a NEMA 4X are two controls that not only allow for quieter motor operation, but they also enable both the drives and motors to have longer life expectancies. These controls also exhibit the following characteristics:

- Uses motor hall sensor feedback for commutation
- Fortified with an anodized chassis mount heatsink
- Equipped with quiet 15 kHz PWM switching
- Offers forward/reverse control
- Operates with closed-loop speed control
- Has MOSFET power devices

Part #: 750-30-0002

Part #: 750-30-0003

For over 80 years, Groschopp Inc. has delivered expert technical assistance, superior product performance, quality-honed workmanship and industry experience in the manufacture of highly engineered fractional horsepower electric motors and gear motors for OEM and distribution products. With products designed and manufactured in the USA, Groschopp offers a full line of AC, DC, brushless DC and universal motors—as well as Brushless controls—that can be combined with right angle worm, planetary, right angle planetary or parallel shaft gearboxes. (An ISO 9001:2008 registered company.)
