MME group Expands Second Location by 10,000 sq ft

St. Paul, MN, December 2016 – MME group, a leading vertically integrated contract manufacturer, recently expanded their Maplewood facility by 10,000 square feet. MME is an energized company that has experienced impressive growth in recent years.

MME's new space will house a combination of molding machines, materials staging, and assembly increasing efficiency and turn-around time. The expansion will help take projects of small to large scale, from any industry and of any complexity from ideation to completion.

“Our concept to completion approach has proven a valued element to the marketplace. By listening to our customers over the years, we have established an unmet need in our industry,” said Brian Bussmann, Vice President of MME Group. “Not only is our value in the business model, but it’s also the commitment to making sure every detail is analyzed; that is what sets us apart from our competition.”

The contract manufacturing industry continues to evolve and MME is a leader in that evolution. Beyond the addition of the new space, the company continues to add new equipment, technology and qualified staff to aid in their commitment to be vertically integrated.

Having the resources and capabilities to output products in a productive, cost-effective manor has escalated the success of MME group. Customers find immense comfort in the fact that they are aligned with one of the best contract manufacturers in the industry.

MME is committed to growth and making sure they meet and exceed customers expectations. To learn more about MME group and the growing business, visit [here](#).
