

Press Release

Rigaku Oxford Diffraction presents latest X-ray analytical solutions at 2016 Asian Crystallography Association Meeting

December 8, 2016 – Hanoi, Vietnam [Rigaku Oxford Diffraction](#) is pleased to report its sponsorship of the 14th Conference of the Asian Crystallography Association ([AsCA 2016](#)). The conference, held December 4-7, 2016 at the Hanoi University of Science and Technology, was established to cover all major aspects of crystallography-related disciplines, including synchrotron/neutron, structural biology, chemical crystallography, materials and polymer science, crystal growth/crystallization, electron microscopy, and informatics.

Rigaku Oxford Diffraction, representing its diverse lines of single crystal X-ray diffraction ([XRD](#)) instrumentation, was a key sponsor of the event and conducted informative presentations on a variety of topics related single crystal structure determination.

About Rigaku Oxford Diffraction (ROD)

ROD was formed as the global single crystal business unit of Rigaku Corporation after the acquisition of the former Oxford Diffraction organization from Agilent Technologies in 2015. ROD is a leader in the field of single crystal analysis, both in the field of chemical crystallography as well as well as macromolecular crystallography. Formed in 1951, Rigaku Corporation is a leading analytical instrumentation company based out of Tokyo, Japan

About Rigaku

Since its inception in Japan in 1951, Rigaku has been at the forefront of analytical and industrial instrumentation technology. Rigaku and its subsidiaries form a global group focused on general-purpose analytical instrumentation and the life sciences. With hundreds of major innovations to their credit, Rigaku companies are world leaders in X-ray spectrometry, diffraction, and optics, as well as small molecule and protein crystallography and semiconductor metrology. Today, Rigaku employs over 1,400 people in the manufacturing and support of its analytical equipment, which is used in more than 90 countries around the world supporting research, development, and quality assurance activities. Throughout the world, Rigaku continuously promotes partnerships, dialog, and innovation within the global scientific and industrial communities.
