FOR IMMEDIATE RELEASE:

Groschopp, Inc. Releases Compact and Energy Efficient Brushless Control

Sioux Center, IA, October 6, 2016—Groschopp, Inc. is announcing two compact brushless controls that are able to produce speed commutation and control for motors with continuous ratings up to 1000 watts. These controls, 750-30-0004 (chassis) and 750-30-0005 (NEMA 4X), provide variable speed operations for larger Brushless DC motors and demonstrates the following characteristics:

- Operates with closed-loop speed control
- Fortified with an anodized chassis mount heatsink
- Equipped with quiet 15 kHz PWM switching
- Offers forward/reverse control
- Uses motor hall sensor feedback for commutation

Part #: 750-30-0004

Part #: 750-30-0005

For over 80 years, Groschopp Inc. has delivered expert technical assistance, superior product performance, quality-honed workmanship and industry experience in the manufacture of highly engineered fractional horsepower electric motors and gear motors for OEM and distribution products. With products designed and manufactured in the USA, Groschopp offers a full line of AC, DC, brushless DC and universal motors—as well as Brushless controls—that can be combined with right angle worm, planetary, right angle planetary or parallel shaft gearboxes. (An ISO 9001:2008 registered company.)
