

RETHINK THE PATIENT REGISTRATION PROCESS

Clearwave is transforming healthcare in a way that allows the focus to be exactly where it should be – on the patient. No longer will it be necessary for front office staff to spend valuable time and energy compiling paperwork and insurance information that is often out-of-date or incorrect. This is frustrating for both the patient and your staff. With Clearwave, your staff can focus on the individual patient providing better customer service and an enhanced patient experience.

SAVE TIME & IMPROVE PROCESSES

Patients using Clearwave spend less than 3 minutes checking in

Allows staff members more time for other tasks

Bi-directional interface with all backend systems

Increase patient satisfaction

MAXIMIZE REVENUE

Improved point of service collection with copays and outstanding balances

Ability to collect multiple co-pays for same day visit/multiple appointments

Reduced administrative costs/reallocation of staff

Targeted patient messaging improving patient health and wellness while increasing revenue
