

Product Announcement

NEW!
GATEWAY
AC1200

IgniteNet's Gateway AC1200 is a cost-effective, cloud-managed 802.11ac wireless router gateway. The Gateway AC1200 contains two independent, concurrent-operating radios – one 802.11ac (5 GHz) radio and one 802.11n (2.4 GHz) radio – capable of delivering blisteringly fast wireless speeds. The sleek design of the Gateway AC1200 allows it to be placed inconspicuously in both offices and homes.

Residential

The Gateway AC1200 can be wall or desktop mounted, greatly simplifying residential installations.

Business

The Gateway AC1200 supplies ample throughput for the most demanding business environments.

Apps Integration

Integrate cutting edge apps & services including audio streaming, bandwidth monitoring, content filtering and more.

Ethernet

With 5 gigabit Ethernet ports, allows users to fully utilize bandwidth.

CLOUD-ENABLED
NETWORKING

With the **IgniteNet Cloud Controller**, manage thousands of devices from anywhere in the world for easy, powerful, & affordable cloud-managed WiFi. Empower consumer devices to do so much more than the previous generation by integrating our ever-expanding collection of apps and services.

Gateway AC1200
