CHANGE THE PLAN

Internet, Digital Printing & Innovative Print Technology has changed the way print is being ordered. Customers are looking for cashless payment & quality services at competitive pricing, which has pushed printing companies to redefine their existing strategy.

Manual Print Order Flow

Average 17 communications before order is processed

Challenges of Traditional Print Order System

High Human Dependency

Every process is manual and key people are involved in day-to-day tasks

High Error Cost

Changes are communicated through email or phones, leading to high error cost for printers

No Local Advantage

Growth in logistics has reduced geo boundaries, so you are competing with printers across India

No Client Loyalty

No strategy to retain clients, It's order to order basis, sales rep goes and takes key clients

Small Orders Expensive

Same efforts and cost to manage small or large orders

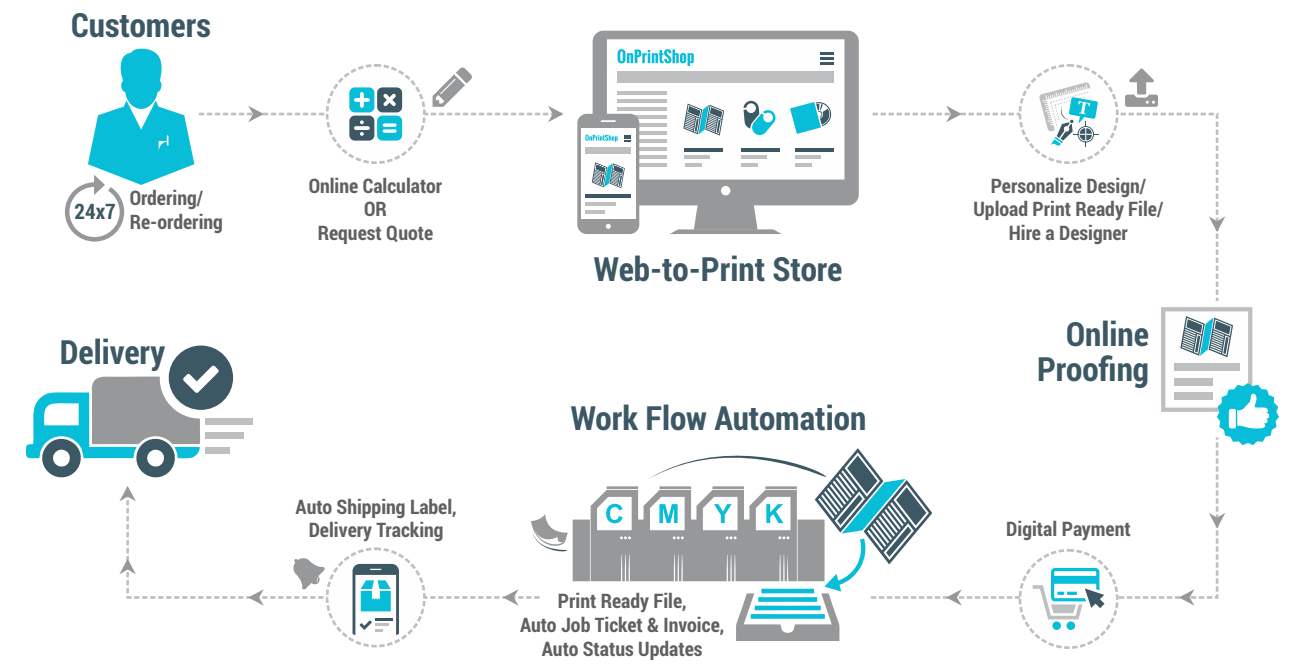

Assumption Based Decisions

No consistent client data or analytics, so can't get signals of changing client needs

PLAN THE CHANGE

Printers across the globe are investing in technology to automate repetitive tasks, maximize productivity and be creative to quickly adapt to changing needs. OnPrintShop has developed easy-to-use print order management to be ready for 21st century buyers.

Automated Order Management Flow

Orders processed 75% faster than manual processing

Advantages of Print Order Management System

Integrated Operation

Once client confirms order, all back end processes are in sync and integrated

Reduce Error Cost

Client reviews and approves order online, which helps reduce errors by 80%

Reduce Human Dependency

Auto invoice, job tickets, status updates to clients & auto payment and shipping

Increase Repeat Business

B2B & B2C portals to manage designs, easy reorder, add new products & personalize marketing campaigns

Expand Business

Hybrid business model combination of technology & team allows to grow understanding of client analytics

Meet Changing Needs
