FOR IMMEDIATE RELEASE

New Automation, DevOps, and Test Management Courses Offered at SQE Training's Software Testing Training Weeks

JACKSONVILLE, FL — SQE Training, a TechWell company, has announced new and expanded courses in automation, DevOps, and test management for their 2017 Software Testing Training Weeks.

"Much is expected from today's software professionals," said Stephanie Fender, Senior Training Manager. "The courses we offer at our Software Testing Training Weeks address these challenges by giving test/QA professionals both the knowledge and the practical skills needed to deliver high-value products in record time."

In the [*Software Test Management, Planning, and Measurement*](#) class, experienced testers, test leads, and test managers will learn how to achieve a consensus on important test strategy issues such as resource allocation, risk prioritization, automation, and more. The [*Fundamentals of DevOps Certification—ICAgile*](#) class offers test/QA professionals, operations engineers, software developers, project managers, and business owners lessons to help avoid the common mistakes of DevOps implementations and to leverage DevOps best practices, including test automation and continuous testing.

One of SQE Training's most popular courses, [*Agile Test Automation—ICAgile*](#), has been expanded for 2017. Agile team members involved in testing, analysis, and deployment will explore the many ways automation supports agile testing in this two-day course with real-world, vendor-neutral examples of agile test automation approaches and tools. Product owners and managers will gain important insights into the benefits and trade-offs related to agile test automation.

[*Software Testing Training Weeks*](#) offer software professionals the opportunity to maximize their training by building a customized week of instruction. In addition to the aforementioned courses, courses are offered in software security, test design, and ISTQB® and ICAgile certification training. Event dates and locations include March 6-10, in San Diego, CA, April 3-7, in Boston, MA, and June 12-16, in Chicago, IL.

Details on each Software Testing Training Week and all 10 courses, including ways to save, can be found at sqetraining.com/trainingweek.

###

ABOUT SQE TRAINING:

SQE Training, a TechWell company, (sqetraining.com) helps organizations worldwide improve their skills, practices, and knowledge in software development and testing. SQE Training offers certification for software testers through the ISTQB®—International Software Testing Qualifications Board, agile certifications through the ICAgile, ScrumMaster and Product Owner certifications through the Scrum Alliance®, and

requirements engineering certifications through IREB, the International Requirements Engineering Board. SQE Training is also a Registered Education Provider (R.E.P.) with the Project Management Institute (PMI).

ABOUT TECHWELL:

Learn. Connect. Contribute—TechWell (techwell.com) delivers training, conferences, communities, and publications to software development professionals worldwide. Since 1986, the TechWell family of products has grown to include some of the most trusted resources in the software development community: SQE Training, the STAR conferences, the Better Software, Agile Dev, and DevOps conferences, the Mobile Dev + Test conference, IoT Dev + Test conference, StickyMinds, AgileConnection, CMCrossroads, and *Better Software* magazine.
